This guided tour of how AI will impact the future of work explores the ways both companies and employees can adapt to the new normal. Artificial intelligence is taking over. Ask Alexa to call a client or confirm your schedule for the day and she does so immediately. Ask her a question, give her a command, or just share a joke together, and she becomes your new best employee—one who never makes a mistake or calls out sick. In other words, Alexa can nix the need for millions of front-line workers. As companies race to keep up with advances in AI, employees must race just to keep their job. Author and public speaker Rhonda Scharf shows readers how a willingness to adapt to the new normal keeps both businesses and their employees relevant in these changing times. *Alexa Is Stealing Your Job* reveals what the future entails by diving into the world of AI and exploring how it impacts lives, careers, and the future.

There is an ever-present void in our black communities caused by the underrepresentation of positive role models who can help guide young men to adulthood. Author Charles D. Dangerfield knows firsthand the struggle of growing up without positive male influences. *Filling a Void* serves as a much-needed resource for these young men. It discusses a wide range of subjects and also acts as an aid to single mothers, who are doing the best they can by themselves, and to young fathers, mentors, educators, and faith-based groups. This handbook teaches young men about: -The characteristics they need to consider in forming their identities. -The way certain emotions may affect their decisions. -The importance of thinking before they act in order to avoid poor choices. -The dos and don'ts for encounters with law enforcement. Both hopeful and practical, this guide for young black men and those who care for them seeks to offer advice and assistance for their journey to manhood.

Master's Thesis from the year 2012 in the subject Business economics - Personnel and Organisation, grade: 60%, Cardiff Metropolitan University, language: English, abstract: The main aim of this dissertation project is to critically examine the chosen organization KFC and to study the effect of its leadership on the motivation of its employees. The research question is "How can management develop their leadership style to motivate staff members to achieving their organizational roles?" Attracting and retaining employees in the current business world has become a big challenge for the organizations. Due to increase in competitors and new entrants, it has become a tough task for the organizations. Globalization has also added a new dimension to the challenge. The workforce is now comprised of people from different countries and different cultures. As a result, keeping them motivated to give a high performance is a big task for the managers. There have been many research and theories of leadership and motivation. However, these are not still fully understood and the relationship between leadership and motivation still needs in depth research. Leaders need to find ways to motivate their subordinates by catering their individual needs and move away from the traditional methods. For the purpose of

explaining the causal relationship between leadership and motivation, the researcher pursued an action research strategy and followed an inductive approach as the researcher had to work closely with the organization. Both quantitative and qualitative data was collected using an employee survey questionnaire and a focus group interview of the managers. The data analysis gave information about leadership and motivation of KFC. The managers stressed on having clear communication, independence and decision making for them. The staff stressed on communication, recognition, rewards, improved work condition and self satisfaction. The results revealed that KFC should look to employ s
