Harvard University Professor David C. McClelland is chiefly known for his work on achievement motivation, but his research interests extended to personality and consciousness. He pioneered workplace motivational thinking, developing achievement-based motivational theory and models, and promoted improvements in employee assessment methods, advocating competency-based assessments and tests, arguing them to be better than traditional IQ and

Personality-based tests. His ideas have since been widely adopted in many organisations, and relate closely to the theory of Frederick Herzberg. He is most noted for describing three types of motivational need, which he identified in this book, *The Achieving Society*: 1. achievement motivation (n-ach), 2. authority/power motivation (n-pow), 3. affiliation motivation (n-affil). First published in 1961, his classic book provides a factual basis for evaluating economic, historical, and sociological theories that explain the rise and fall of civilizations.

Applications. Now more than ever, technological advances continue to increase the range and complexity of tasks that people have to perform. As a discipline, human factors psychology (ergonomics) therefore has an increasingly important role to play in ensuring that the human user's physical characteristics, cognitive abilities and social needs are taken into account in the development, implementation and operation of products and systems. In this book, Jan Noyes provides a comprehensive and up-to-date overview of human-machine interaction and the design of environments at work. Focusing on topics relevant to user-centred design, she includes coverage of the capabilities and limitations of humans, human-machine

interactions, work environments, and organizational issues. Health and safety issues underpin a large amount of work on the human factors of design, and these are addressed fully throughout the book. Each chapter includes case studies that demonstrate the real-world relevance of the points being made and concludes with a list of key points. Although aimed primarily at advanced undergraduates, postgraduates and researchers in organizational and occupational psychology, this book will also be of relevance to students on engineering, computing and applied psychology/human factors programmes.

The four new guides in this best-selling series are ideal for managers at every level. These compact references -- the most accessible single-subject business guides on the market -- demonstrate techniques and skills useful in any work environment.

Leaders want to see changes in behavior as a result of what people have learned and may expect these new behaviors to deliver results for the business. With the third edition of this book, readers have an opportunity to update their understanding of this classic evaluation framework and to learn from the case studies about how to effectively apply the framework to a variety of learning programs. Readers

are presented with the tools and the know-how to tell their own story of value creation.---Foreword by Merrill C. Anderson, Ph.D, Chief Executive Officer, MetrixGlobal, LLC

"This book provides readers with a broad understanding of the emerging field of e-learning and also advises readers on the issues that are critical to the success of a meaningful e-learning environment"--Provided by publisher.

Children learn in contexts, and the spaces, places and people they come into contact with have a deep influence on their development. Urie Bronfenbrenner ' s bioecological model of development places the child at the centre of this complex network, and his influence has been

extensive in early childhood

education. This book presents an introduction to Bronfenbrenner ' s model of development, drawing on practice-based research to identify and animate key elements of his model ' s impact. It illustrates how his model can help bring quality to early learning environments and incorporates it into daily work with young children. As well as providing a glossary of key terms, Introducing Bronfenbrenner covers areas such as: a bioecological perspective on educational transition; early education as a dynamic process; nurturing children ' s learning and development; reflecting the bioecological in early years practice. Using a variety of vignettes, practical examples of good practice and case studies, Introducing Bronfenbrenner

is an essential guide to his work. It will be of interest to professionals working with children in early childhood settings and to undergraduate students training to become early childhood professionals.
