building, it is normally possible, with careful planning, to erect a Kwikstage scaffold around the perimeter of a building without non-standard bays. If they are required, any infill gaps should occur away from the corner (i.e. in a straight run) and be kept within 600mm. 2 Leave any infill areas until all the standard Kwikstage bays have been erected. 3 Connect the Kwikstage Standards on each side of the infill area together, at each ...

Read Book Kwikstage Scaffolding Users Guide

This new edition of John Illingworth's popular book provides a thorough introduction to the selection of construction methods, their planning and organization on site. Thoroughly revised and updated, *Construction Methods and Planning* takes a practical, down-to-earth approach and features numerous examples and illustrations taken from real situations and sites. In Part One, the main factors which determine the planning of construction methods - site inspections, the site itself, temporary works, design, cost concepts and selection of plant and methods - are discussed. In Part Two, the application of these tools is presented,

covering foundations and basements, in situ and precast concrete structures, steel frames, cladding, internal and external works, waste, methods statements, contract planning control and claims. The author provides an extension of the concept of 'buildability' and new chapters on facade retention and the refurbishment of domestic accommodation.
