Why were the American POWs imprisoned at the “ Hanoi Hilton ” so resilient in captivity and so successful in their subsequent careers? This book presents six principles practiced within the POW organizational culture that can be used to develop high-performance teams everywhere. The authors offer examples from both the POWs ' time in captivity and their later professional lives that identify, in real-life situations, the characteristics necessary for sustainable, high-performance teamwork. The book takes readers inside the mind of James Stockdale, a fighter pilot with a degree in philosophy, who was the senior ranking officer at the Hanoi prison. The theories Stockdale practiced become readily understandable in this book. Drawing parallels between Stockdale ' s guiding philosophies from the Stoic Epictetus and the principles of modern sports psychology, Peter Fretwell and Taylor Baldwin Kiland show readers how to apply these principles to their own organizations and create a culture with staying power. Originally intending their book to focus on Stockdale ' s leadership style, the authors found that his approach toward completing a mission was to assure that it could be accomplished without him. Stockdale, they explain, had created a mission-centric organization, not a leader-centric organization. He had understood that a truly sustainable culture must not be dependent on a single individual. At one level, this book is a business school case study. It is also an examination of how leadership and organizational principles employed in the crucible of a Hanoi prison align with today ' s sports psychology and modern psychological theories and therapies, as well as the training principles used by Olympic athletes and Navy SEALs. Any group willing to apply these principles can move their mission forward and create a culture with staying power—one that outlives individual members.

"Across the realms of civic and private enterprise alike, bureaucracies vitally impact our security, freedoms, and everyday life. With so much at stake, competence, efficiency, and fiscal prudence are essential, yet Americans know these institutions fall short. Many despair that they are too big and too hard to reform. Robert Gates disagrees. Having led change successfully at three monumental organizations -- the CIA, Texas A & M University, and the Department of Defense -- he offers an insider's look at how major bureaus, organizations, and companies

can be transformed. Gates includes advice on tailoring reform to the operative culture (we see how Gates worked within the system to increase diversity at Texas A & M); effecting change within committees; engaging the power of compromise ("In the real world of bureaucratic institutions, you almost never get all you want when you want it"); and listening and responding to your team" (ed.).

No Greater Honor is a fascinating look at leadership principles from the perspective of a retired Major General in the US Army, one of the few women to have achieved that rank. The advice she offers is based on her own experience but is also applicable to other industries. She shares the lessons she learned from almost 40 years uniform. Her stories capture the opportunities she seized and the struggles she faced as she rose through the ranks from Private First Class to Major General. General Price shares stories that reflect the difficulty of a woman entering into the white male-led military. They are poignant, humorous, and thought-provoking. Her leadership lessons are particularly relevant to the social justice movements of 2020. General Price provides a look at the Army from the 1970s until her retirement in 2014. She walks you through the social change of the seventies that opened the doors to women, allowing them to work in roles that had traditionally been held by men-only. General Price provides plenty of content to guide others on their journey using the techniques from her military training.
