‘ Fighting Scholars ’ offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book ’ s main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of ‘ habitus ’ is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body. The book ’ s most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant ’ s ‘ Body and Soul ’ : the construction of a ‘ carnal sociology ’ that constitutes an exploration of the social world ‘ from ’ the body.

Believe the Make-Believe is a poetry collection written over a period of 5 years. The topics are diverse but one thing in common about these verses is an undercurrent of self-exploration through various experiences of life and being with and working with different kinds of people. A lot of times we face situations that forces us to change our perception about life, each poem sprouted through such an experience. A lot of times things make no sense at all, that 's when we are forced to Believe the Make-Believe.

This important volume brings together rigorous scholarship on the events of 9-11-2001, and assesses whether the truth has been told by the U.S. government. The lead chapter shows that eleven of FBI-named Arabic hijackers could not have been on the planes, while the Dulles airport videotape -- essentially being the case that hijackers boarded flights -- has very serious authentication problems. The next three chapters examine insider trading beforehand and the 9-11 flights themselves, then the evidence -- based

partly upon newly-released reports of more than 500 firefighters -- permitting a conclusion that three buildings in the WTC complex were brought down by demolition, followed by discussion of scheduled military drills which confused standard operating procedures, and concluding with a surprising connection to the death of Senator Wellstone, leading critique of the Bush administration. The third part opens with a chapter examining the connection between Al-Qaeda and Western covert operations, showing how Al-Qaeda is inseparably connected to the latter. The following chapter shows that Machiavellian state terrorism is rather common and not at all unlikely for 9-11, while the following examines how the 9-11 Commission wrote its own history, rather than reporting and analyzing true history. The rise of Islamophobia as an ideological force to sustain U.S. imperialism is then introduced. The final chapter, while not explicit, offers a possible connection to the process of undermining pensions in the U.K. The volume can be seen as a definitive, scholarly explanation of 9-11 as a world-changing event.

Robotics is envisioned as a field that will make human life easier and better. Part of that vision includes taking care of the sick, injured, and disabled. Caregiving robots are already on the job in some places. From monitoring a person's health to fetching items and cleaning homes to providing companionship, robots are improving people's lives. Readers will discover all the ways that robots can assist when special help is needed. A hands-on activity helps students learn more about science and supports the NGSS K-2 Engineering Design Standards.

Since the Cultural Revolution, data have been uncovered to illuminate that tumultuous decade. In this volume 13 scholars examine the gap between the ideology of the Revolution and the harsh and contradictory reality of its outcome. They focus particularly on the violence, coercion, and constant tension between the need for centralization to enforce policies and the need for decentralizing decision-making if those goals were to be achieved.

As a final installment in a military career wrought with horrid events, Jess is sent to rescue a Braugh warrior and his men from prison. All she wants is to be safely on her home planet to forget her throwback status and find a normal existence. The warrior's intimidating size and raw strength contrast with his tender nature, skillful lips and gentle touch, awakening sexual urges she thought had been stripped away years prior. Shane knows the piercings adorning Jess' body once created pain and taught her to suppress arousal and desire. And he knows what's needed to take her beyond the torture. But providing a sexual release may prove easier than convincing her something stronger lies between them. All he needs to claim his angel, in every way, is her consent.

Tranimacies is a neologism that pushes and pulls together transness and animality so as to better germinate unruly, wily, perverse relationships between them, and their spawn. Through tranimacies the book aims at rethinking the linking of liberation struggles amongst former colonized peoples and lands, minoritized genders and sexualities, racially marked

persons and non-human animals, and does so in a variety of geopolitical and temporal sites. This rich compendium includes original scholarship and dialogues as well as poetry, comix, bioart, and performance documentation. The composite term of *tranimacies* enmeshes several everyday and scholarly concepts: transgender, animal, animacy, intimacies. This edited volume's bundle of theoretical and artistic works insists on the beating heart of embodied experiences and political pulses at the core of these concepts. The authors show that *tranimacies* are spread throughout what Mel Y. Chen describes as the "animacy hierarchies" that delimit zones of possibility and agency, confounding the vertical order with transversal movements. As an intervention into the burgeoning debates within and across trans, animal, critical race, and posthuman studies this publication seeks to destabilize the logic of "turns" in critical theory, and through sticky intimacies uncover how animality, race, and gender underscore the humanist production of meanings. By taking a decolonial approach (in the main, but not exclusively) the authors hope to shift debates in animal studies towards accounting for and delinking from colonial mentalities. Three poems interweave our selection of chapters, which together forge three lines of inquiry defined by a certain ethos: transhistories of the present, lessons from the bestiary, and #animatingephemera. The chapters in this book were originally published as a special issue of *Angelaki*.

Whether used alone or in a group setting, this invaluable teaching tool will give meaningful exposure to the beauty of the Catholic faith.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.
