The Five Minute Read

Lisa Genova is the New York Times bestselling author of the novels "Still Alice," "Left Neglected," "Love Anthony," "Inside the O'Briens" and "Every Note Played." "Still Alice" was ...

Left Neglected by Lisa Genova is a powerful, poignant story of a woman who, after a traumatic brain injury, struggles to find meaning and purpose as her concept of self gradually slips away. But Alice is a remarkable woman, and her family learn more about her and each other in their quest to hold on to the Alice they know. Her memory hanging by a frayed thread, she is living in the moment, living for each day. But she is still Alice. 'Remarkable ... illuminating ... highly relevant today' Daily Mail 'The most accurate account of what it feels like to be inside the mind of an Alzheimer's patient I've ever read. Beautifully written and very illuminating' Rosie Boycott 'Utterly brilliant' Chrissy Iley

Sarah Nickerson, a career-driven young mother, suffers a traumatic brain injury in a car accident that leaves her unable to perceive left-side information, a disability that causes her to struggle through an uncertain recovery as she adapts to her new life.

One typical morning, Sarah Nickerson, a woman in her mid-thirties, is late for work, racing in her car after dropping her kids off at school and daycare. She tries to phone in to a meeting she should already be at when she takes her eye off the road for a second too long. In that blink of an eye, all the rapidly moving parts of her over-scheduled life come to a screeching halt. Sarah suffers a traumatic head injury. Her memory and intellect are intact, but she has lost all interest in, and the ability to perceive, information coming from the left side of space. The left side of her world has gone. Sarah only eats the food from the right side of her plate. She can't see her watch, or her engagement diamond or her wedding ring. She tries to use a wheel chair but can only spin in circles as her left arm dangles by her side.

In Lisa Genova 's New York Times bestselling novel—and Academy Award –winning film—of resilience in the face of a devastating diagnosis, a vibrant mother in her thirties learns what matters most in life when a car crash leaves her with a traumatic brain disorder called “ left neglect. ” Sarah Nickerson, like any other working mom, is busy trying to have it all. One morning while racing to work and distracted by her cell phone, she looks away from the road for one second too long. In that blink of an eye, all the rapidly moving parts of her over-scheduled life come to a screeching halt. After a brain injury steals her awareness of everything on her left side, Sarah must retrain her mind to perceive the world as a whole. In so doing, she also learns how to pay attention to the people and parts of her life that matter most. In this powerful and poignant New York Times bestseller, Lisa Genova explores what can happen when we are forced to change our perception of everything around us. Left Neglected is an unforgettable story about finding abundance in the most difficult of circumstances, learning to pay attention to the details, and nourishing what truly matters.

From the bestselling author of Still Alicecomes a heartfelt novel about friendship and a mother coping with the loss of her autistic son Olivia Donatelli's dream of a 'normal' life was shattered when her son, Anthony, was diagnosed with autism at age three. He didn't speak. He hated to be touched. He almost never made eye contact. And just as Olivia was starting to realise that happiness and autism could coexist, Anthony died. Now she's alone in a cottage on Nantucket, separated from her husband, desperate to understand the meaning of her son's short life, when a chance encounter with another woman facing her own loss brings Anthony alive again for Olivia in a most unexpected way. In a piercing story about motherhood, love and female friendship, Lisa Genova offers us two unforgettable women on the verge of change who discover the small but exuberant voice that helps them both find the answers they need. Fans of The Reason I Jumpand The Curious Incident of the Dog in the Night-time will love Lisa Genova's story: always authentic and utterly moving. "Remember how you couldn't put down Still Alice? Well, clear your schedule-because you're going to feel the same way' Jodi Picoult"

A moving story of a woman with early onset Alzheimer's disease, now a major Academy Award-winning film starring Julianne Moore and Kristen Stewart. Alice Howland is proud of the life she worked so hard to build. At fifty, she's a cognitive psychology professor at Harvard and a renowned expert in linguistics, with a successful husband and three grown children. When she begins to grow forgetful and disoriented, she dismisses it for as long as she can until a tragic diagnosis changes her life - and her relationship with her family and the world around her - for ever. Unable to care for herself, Alice struggles to find meaning and purpose as her concept of self gradually slips away. But Alice is a remarkable woman, and her family learn more about her and each other in their quest to hold on to the Alice they know. Her memory hanging by a frayed thread, she is living in the moment, living for each day. But she is still Alice. 'Remarkable ... illuminating ... highly relevant today' Daily Mail 'The most accurate account of what it feels like to be inside the mind of an Alzheimer's patient I've ever read. Beautifully written and very illuminating' Rosie Boycott 'Utterly brilliant' Chrissy Iley

“ Unsparing in her depiction of the disease ’ s harrowing effects, neuroscientist Genova also celebrates humanity. ” —People “ Sometimes it ’ s easier to tell truth in fiction...And she tells it with heart and hope. ” —NPR “ Her juxtaposition of scientific detail with compassionate, heartfelt storytelling is unparalleled. ” —Bookreporter “ Every Note Played will grip and gut you. ” —The Boston Globe From neuroscientist and New York Times bestselling author of Still Alice comes a powerful exploration of regret, forgiveness, freedom, and what it means to be alive. An accomplished concert pianist, Richard received standing ovations from audiences all over the world in awe of his rare combination of emotional resonance and flawless technique. Every finger of his hands was a finely calibrated instrument, dancing across the keys and striking each note with exacting precision. That was eight months ago. Richard now has ALS, and his entire right arm is paralyzed. His fingers are impotent, still, devoid of possibility. The loss of his hand feels like a death, a loss of true love, a divorce—his divorce. He knows his left arm will go next. Three years ago, Karina removed their framed wedding picture from the living room wall and hung a mirror there instead. But she still hasn ’ t moved on. Karina is paralyzed by excuses and fear, stuck in an unfulfilling life as a piano teacher, afraid to pursue the path she abandoned as a young woman, blaming Richard and their failed marriage for all of it. When Richard becomes increasingly paralyzed and is no longer able to live on his own, Karina becomes his reluctant caretaker. As Richard ’ s muscles, voice, and breath fade, both he and Karina try to reconcile their past before it ’ s too late. Poignant and powerful, Every Note Played is a masterful exploration of redemption and what it means to find peace inside of forgiveness.

NEW YORK TIMES BESTSELLER • A fascinating exploration of the intricacies of how we remember, why we forget, and what we can do to protect our memories, from the Harvard-trained neuroscientist and bestselling author of Still Alice. “ Using her expertise as a neuroscientist and her gifts as a storyteller, Lisa Genova explains the nuances of human memory ” —Steven Pinker, Johnstone Professor of Psychology, Harvard University, author of How the Mind Works Have you ever felt a crushing wave of panic when you can't for the life of you remember the name of that actor in the movie you saw last week, or you walk into a room only to forget why you went there in the first place? If you're over forty, you're probably not laughing. You might even be worried that these lapses in memory could be an early sign of Alzheimer's or dementia. In reality, for the vast majority of us, these examples of forgetting are completely normal. Why? Because while memory is amazing, it is far from perfect. Our brains aren't designed to remember every name we hear, plan we make, or day we experience. Just because your memory sometimes fails doesn't mean it's broken or succumbing to disease. Forgetting is actually part of being human. In Remember, neuroscientist and acclaimed novelist Lisa Genova delves into how memories are made and how we retrieve them. You'll learn whether forgotten memories are temporarily inaccessible or erased forever and why some memories are built to exist for only a few seconds (like a passcode) while others can last a lifetime (your wedding day). You'll come to appreciate the clear distinction between normal forgetting (where you parked your car) and forgetting due to Alzheimer's (that you own a car). And you'll see how memory is profoundly impacted by meaning, emotion, sleep, stress, and context. Once you understand the language of memory and how it functions, its incredible strengths and maddening weaknesses, its natural vulnerabilities and potential superpowers, you can both vastly improve your ability to remember and feel less rattled when you inevitably forget. You can set educated expectations for your memory, and in doing so, create a better relationship with it. You don't have to fear it anymore. And that can be life-changing.

Enjoy the best of Lisa Genova ' s powerful, poignant storytelling with this set of her two New York Times bestselling novels, Still Alice and Left Neglected. STILL ALICE An accomplished professor diagnosed with Alzheimer ' s disease learns that she is more than what she can remember. Now a major motion picture from Sony Pictures Classics. LEFT NEGLECTED A busy multitasking mother in her thirties learns to pay attention to what matters most in life after a car crash leaves her with a traumatic brain injury and a bizarre neurological condition called Left Neglect.

A New York Times bestseller A Library Journal Best Books of 2015 Pick A St. Louis Post-Dispatch Best Books of 2015 Pick A GoodReads Top Ten Fiction Book of 2015 A People Magazine Great Read From New York Times bestselling author and neuroscientist Lisa Genova comes a “ heartbreaking...very human novel ” (Matthew Thomas, author of We Are Not Ourselves) that does for Huntington ’ s disease what her debut novel Still Alice did for Alzheimer ’ s. Joe O ’ Brien is a forty-three-year-old police officer from the Irish Catholic neighborhood of Charlestown, Massachusetts. A devoted husband, proud father of four children in their twenties, and respected officer, Joe begins experiencing bouts of disorganized thinking, uncharacteristic temper outbursts, and strange, involuntary movements. He initially attributes these episodes to the stress of his job, but as these symptoms worsen, he agrees to see a neurologist and is handed a diagnosis that will change his and his family ’ s lives forever: Huntington ’ s disease. Huntington ’ s is a lethal neurodegenerative disease with no treatment and no cure, and each of Joe ’ s four children has a 50 percent chance of inheriting their father ’ s disease. While watching her potential future in her father ’ s escalating symptoms, twenty-one-year-old daughter Katie struggles with the questions this test imposes on her young adult life. As Joe ’ s symptoms worsen and he ’ s eventually stripped of his badge and more, Joe struggles to maintain hope and a sense of purpose, while Katie and her siblings must find the courage to either live a life “ at risk ” or learn their fate. Praised for writing that “ explores the resilience of the human spirit ” (San Francisco Chronicle), Lisa Genova has once again delivered a novel as powerful and unforgettable as the human insights at its core.

Julia Fox Garrison refused to listen to the professionals she called Dr. Jerk and Dr. Panic, who—after she suffered a massive, debilitating stroke at age thirty-seven—told her she'd probably die, or to Nurse Doom, who ignored her emergency call button. Instead she heeded the advice of kind, gifted Dr. Neuro, who promised her he would "treat your mind as well as your body." Julia figured if she could somehow manage to get herself into a wheelchair, at least she'd always find parking. But after many, many months of hospitalization and rehab—with the help of family, friends, and her own indomitable spirit—Julia not only got into a wheelchair, but she got back out. Don't Leave Me This Way is the funny, inspiring, profoundly moving true story of a woman's fight for her life and dignity—and her determined quest to awaken an entrenched, unfeeling medical community to the fact that there's always a human being inside every patient.
