Falling autumn leaves, bare winter branches, bushfires and quarantine-these are poems that chronicle the ordinary and strange in our times. In the midst of the coronavirus pandemic, Matthew Pullar's latest collection of poems seeks to find space for grief and for our neighbour in the same open heart.

By taking you through the development of a real web application from beginning to end, the second edition of this hands-on guide demonstrates the practical advantages of test-driven development (TDD) with Python. You'll learn how to write and run tests before building each part of your app, and then develop the minimum amount of code required to pass those tests. The result? Clean code that works. In the process, you'll learn the basics of Django, Selenium, Git, jQuery, and Mock, along with current web development techniques. If you're ready to take your Python skills to the next level, this book—updated for Python 3.6—clearly demonstrates how TDD encourages simple designs and inspires confidence. Dive into the TDD workflow, including the unit test/code cycle and refactoring Use unit tests for classes and functions, and functional tests for user interactions within the browser Learn when and how to use mock objects, and the pros and cons of isolated vs. integrated tests Test and automate your deployments with a staging server Apply tests to the third-party plugins you integrate into your site Run tests automatically by using a Continuous Integration environment Use TDD to build a REST API with

(Boosey & Hawkes Concert Band). Written in 1943-44 as a ballet for Martha Graham, Appalachian Spring is one of Aaron Copland's most celebrated compositions and winner of the Pulitzer Prize in 1945. In this edition for concert band, Robert Longfield has skillfully adapted the most striking and beautiful sections from the orchestral suite. The work ranges in scope from delicate and soloistic to the overpowering force of the full ensemble, culminating with Copland's signature setting of "Simple Gifts." A wonderful opportunity for band members and their audiences to enjoy this beloved music from one of America's preeminent composers. Dur: 8:00

"Songwriting" is both a comprehensive course for beginning and experienced songwriters and a rich source of new ideas, inspiration, and tricks of the trade for those who have already achieved professional standing. This new edition not only contains all of the original volume's cogent advice on how to write the always-popular genres - the country song, the ballad, and the love song - but it has been revised to include: examples of hard rock, acid, heavy metal, bubblegum, hip-hop, salsa, rap, gangsta, reggae, ska, soul, and many other of today's most recorded styles; finding a song concept, distilling the hook, choosing a form, adding harmony and selecting rhythm; an appendix telling how to copyright, computerize, notate, record, and sell your song; and full glossary of musical and songwriting terms, an explanation of rap-speak with a useful section on rhyme for rap songs, many musical examples of well-known songs, and a complete index. For the novice, Stephen Citron goes step-by-step through the writing of a song presupposing no prior knowledge of notation, harmony, rhythmic values, or rhyme. For the more experienced songwriter, "Songwriting" will serve as a one-stop reference and as an endless source of fresh ideas.

Who knew that Paul McCartney originally referred to Yesterday as 'Scrambled Eggs' because he couldn't think of any lyrics for his heart-breaking tune? Or that Patti LaBelle didn't know what 'Voulez-vous couches avec moi ce soir?' actually meant? These and countless other fascinating back stories of some of our best-known and best-loved songs fill this book, a collection of the highly successful weekly The Life of a Song columns that appear in the FT Weekend every Saturday. Each 600-word piece gives a mini-biography of a single song, from its earliest form (often a spiritual, or a jazz number), through the various covers and changes, often morphing from one genre to another, always focusing on the 'biography' of the song itself while including the many famous artists who have performed or recorded it. The selection covers a wide spectrum of the songs we all know and love - rock, pop, folk, jazz and more. Each piece is pithy, sparkily written, knowledgeable, entertaining, full of anecdotes and surprises. They combine deep musical knowledge with the vivid background of the performers and musicians, and of course the often intriguing social and political background against which the songs were created.
