“On the Ides of March, an ill wind blows no good -- especially when it knocks down a tree limb in the oldest equine graveyard in America, revealing remains that are decidedly un-equine. It falls to Master of the Foxhunt, the indomitable “Sister” Jane Arnold and her trusty hounds to investigate an old murder with present day repercussions. To start off, the complicated relations between three old families and their prize thoroughbreds must be untangled. And when Sister’s troublesome nemesis Crawford Howard sticks his nose in, she must make a difficult choice. Someone has killed and will kill again to keep a dark secret, but Sister Jane is not one to let sleeping dogs lie.”..

Professionals working with traumatized children are often asked whether it would be better to ‘let sleeping dogs lie’, because the child may not be ready to discuss their experiences, and out of fear that they may become further distressed or disturbed. In Treating Chronically Traumatized Children, Arianne Struik presents the case for waking those ‘sleeping dogs’ in a safe and structured environment, in order to allow the healing process to begin and prevent trauma later in life. Struik has developed a method for those cases labelled most difficult to treat, involving deregulated, traumatized children who refuse to talk about their memories, or claim to have ‘forgotten’ them completely. It incorporates factors in the child’s environment and network to ensure that they are safe and secure before beginning the process, and stable throughout treatment. Downloadable worksheets enhance the book’s content and make each section straightforward to work through, supporting the child through the stabilization, processing and integration phases of treatment. Illustrated throughout by case studies and comprehensive explanation of the theory and the treatment method, Treating Chronically Traumatized Children is clear and accessible and is ideal for psychologists, psychiatrists, psychotherapists and counsellors, as well as parents and anyone working with chronically traumatized children and adolescents.

SHORTLISTED FOR THE PAUL TORDAY MEMORIAL PRIZE 2021 In a quiet leafy suburb of Kingston upon Thames the police are baffled by a series of seemingly indiscriminate killings, and it appears that the perfect murders are being perpetrated. But is there something linking them together? Could there be a serial killer, a psychopath, on the loose? The British police across the South of England must collaborate with MI5, the drug squad, and Interpol in an effort to track down the culprit. And just as they seem to be getting somewhere it looks like a turf war between the Russian and American mafia might be beginning. Can they reach the truth, before it all goes too far? And will there ever be a happy ending?

Here is wit and wisdom in the form of proverbs from all over the world, dramatized and complemented with humorous cartoons. The sayings are arranged by subjects that include Envy, Experience, Gratitude, Justice, Luck, Wealth, and ten others.

Darren Dirkowitz thought his life was over when his tipstily-top-secret alter ego, Dirk Daring, Secret Agent, was outed to the entire Preston Middle School student body. If only he’d been so lucky. Now the Wolf Lords—a gang of teen thugs bent on wringing every last penny out of Preston students—are breathing down his neck. There’s only one solution: Dirk Daring must embark on his most daring mission yet. A mission so audacious, so cunning, so doggone crazy, that if it succeeds, the Wolf Lords will wind up begging for mercy. But first, Darren must bring his own disobedient “associates” to heel. Let Sleeping Dogs Lie is the sequel to the runaway bestseller Dirk Daring, Secret Agent.

Few issues have been as divisive as prostate cancer screening. While some prominent Australian urologists are very active in talking up the importance of prostate cancer screening, few Australians would be aware that no government anywhere in the world has a formal policy supporting prostate cancer screening. Nor would they be aware that aside from some professional urological societies, no reputable cancer control or expert prevention agency anywhere in the world currently recommends screening for the disease. Despite this international expert consensus, de facto screening of populations is well under way, being driven by well-meaning advice about the importance of men becoming more informed about their health.Medical science is today unable to predict with any precision which early discovered prostate cancers will turn out to be those that kill, and particularly which will kill men in middle age. The frontline diagnostic tool in efforts to screen for prostate cancer - the PSA test - is a tool which has very poor ability to find problematic cancers. It finds many benign cancers which could have been left alone. The aim of the book is to provide a detailed examination of the main questions that a man should be asking before deciding to get tested for prostate cancer. It will help men to make informed decisions that best fit their circumstances and temperament. Let sleeping dogs lie? is a 'must read' for all men who care about their health, and those who support them.
