Rates consumer products from stereos to food processors

This Guide is produced on behalf of the European Science Foundation Asia Committee. The Guide provides a comprehensive survey of researchers, institutes, university departments, museums, organisations, and newsletters in the field of Asian Studies in Europe. The 352 page Guide is published by the International Institute for Asian Studies in co-operation with Curzon. This is the first such guide ever published, and contains highly detailed current information including specialisation by subject and region for each entry. The Guide contains an alphabetical list of 5,000 European Asianists; 1,200 institutes and university departments; 300 museums, organisations, and newsletters.

This book is written in a simple, straightforward manner without complicated mathematical derivatives. Compiled by experienced practitioners, this guide covers topics such as basic principles of vadose zone hydrology and prevalent monitoring techniques. Case studies present actual field experiences for the benefit of the reader. The Handbook provides practitioners with the information they need to fully understand the principles, advantages, and limitations of the monitoring techniques that are available. The Handbook of Vadose Zone Characterization & Monitoring expands and consolidates the useful and succinct information contained in various ASTM documents, EPA manuals, and other similar texts on the subject, making it an invaluable aid to new practitioners and a useful reference for seasoned veterans in the field.

This detailed background review paper provides a summary of the relevant literature (up to September 2001) relevant to the standardisation and validation of the rodent uterotrophic bioassay.

This Detailed Review Paper (DRP) is intended to provide the current state-of-the-knowledge in the area of fish screening assays for chemicals active at the endocrine level on the reproductive system of test animals.

This test identifies agents that cause structural chromosome aberrations in cultured mammalian somatic cells.

This book systematically introduces readers to the operator method, which can be used in different stages of urban planning. Energy planning should ideally be accompanied by urban planning, ranging from comprehensive planning and detailed planning, to the design of individual construction projects. This book discusses a range of methods and models for defining energy planning objectives; analyzing and predicting energy demand; assessing available energy resources; optimizing integrated energy systems; analyzing the cost-effectiveness of proposals; implementation management; and post-assessment. Part one focuses on energy planning in different urban planning stages, while part two provides detailed discussions of key issues related to energy planning.

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

"This book provides relevant theoretical perspectives on the use of ICT in Urban Planning as well as an updated account of the most recent developments in the practice of e-planning in different regions of the world"--Provided by publisher.
