Traces the history of earth moving equipment, looks at cable excavators, mining shovels and draglines, walking draglines, and hydraulic backhoes, and discusses the manufacture of large excavation equipment

How Cool Are Penguins is a book that will introduce young children to the world of penguins. It is written and illustrated in a fun and informative way that will entertain both the young and the young at heart.

After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.

AEC, Bristol, Crossley, Daimler, Dennis, Leyland and others were all manufacturers of passenger vehicle chassis which could be seen throughout the country in the years following the end of World War Two. They produced a wide range of double deck and single deck buses and coaches, bodied by a considerable number of body builders. With the exception of Dennis, all those chassis makers have now disappeared, along with nearly all the body builders. In addition, most operators of this variety of vehicles are no longer in existence, being primarily absorbed into larger operations. This book can only give a small indication of the major role Steve and his Quantock Heritage fleet have played in preserving not only part of the engineering history of this country, but its effect also on social history. In practical terms he has displayed this by enabling the general public to see, enjoy, and also use vehicles of a bygone era.

Join the Stickmen on a fascinating tour of monster vehicles, transporters, and construction tools. You'll discover some of the largest machines in existence and see the Stickmen (accidentally) test the limits of gravity!
