A one-volume dictionary of religion based on concepts drawn partly from the various religious traditions and partly from the historical and reflective study of religion as a modern academic discipline. As a dictionary rather than an encyclopedia, there will be concise explanations on a very large number of special terms rather than lengthy essays on selected subjects. Entries will include definitions of terms from various religious traditions which have now entered into current English usage, as well as a wide variety of semi-technical terms from related fields such as philosophy, sociology and social anthropology.

Born Alphonse Louis Constant, French magician Éliphas Lévi (1810–75) wrote prolifically on the occult sciences. His *Histoire de la magie* was first published in 1860. In it, Lévi recounts the history of the occult in Western thought, encompassing its biblical, Zoroastrian and ancient Greek origins, various magical practices of the medieval and early modern periods - including hermeticism, alchemy and necromancy - and the role of magic in the French Revolution. The last section of the book describes nineteenth-century magical practices and includes details of Lévi's own occult experiences. Prepared by Arthur Edward Waite (1857–1942), this English translation was first published in 1913. An editor and translator of numerous magical texts, Waite includes here a preface comprising an eloquent defense of Lévi and intellectual magic. The original French edition is also reissued in the Cambridge Library Collection.

This collection of papers aims to draw lessons and apply indigenous knowledge, wisdom and cultural traditions to suit policy contexts describing the (a) role of individuals (b) communities, and (c) the state to ensure effectively manage water resources. Readers will discover ways in which water was conceptualized, conserved and managed. Contributions will also shed light on the historical, functional and futuristic perspectives of water resources management, and readers will be able to draw lessons and evolve policy guidelines. There are some studies related to scriptures across religions and their perceptions regarding ecological conservation. However, religious studies and their socio-economic and environmental relevance to society, more specifically to the current policy contexts, are limited. This book attempts to bridge this gap, in terms of learning lessons from the past to effectively address the challenges of the present and future. The book will be useful for historians and research scholars studying the place of

water in different cultures, water pricing and water sharing; as well as ecologists and environmental scientists.
