First published in 1999,
this volume begins with a
panoramic survey by Nigel

Urbanization, based on the
inaugural plenary lecture he

gave to the 5th Asian
Urbanization Conference held
in London. In the following
chapters many experts and
practitioners from different
countries and cities provide
a stimulating portrayal of

of one of the greatest
shifts of population (not
just absolutely but
proportionately as well)
ever to have occurred in
human history. Asia includes
more than half the world's
population, but, apart from

the Tiger economies and Japan, it is still overwhelmingly rural. In the last decade or so urbanization has really begun to take off and the shift of population to the cities represents one of the

greatest population movements the planet has ever seen. By 2030 more than 50% of Asia's population will be urban and between now and then more than 500 million people in Asia will have moved - looking for

Planners tend to promote

formal plans as the only
game in town while diverse
efforts of urban actors
shape our cities. Tracking
the development of American
"neighborhood unit" concept
in independent India's
planning practice and

counters misguided
characterization of these
unforeseen efforts as
'unauthorized' by state
authorities. It shows how
the frequently informal and
tacit plans were neither

arbitrary actions nor
aimless subversions but
purposeful future-oriented
efforts that shaped the
envisaged sociality and
spatiality of Indian cities
in more meaningful ways than
the official master plans
