Cooperatives are one of the important economic organizations, generate a huge employment potential and diversified its activities covering almost all possible sectors, touching the needs of the producers as well as the consumers across the world. Entrepreneurship literature rarely mentioned about the relationship between entrepreneurship and cooperative development. In the cooperative literatures too very little has been addressed about the synergy between entrepreneurial behaviour and the degree of economic success or the failures of cooperatives. Without entrepreneurial behavior, cooperatives cannot succeed and they will not even be established. The books available at present in the field of cooperation and cooperatives have not detailed the entrepreneurial behavior of cooperatives and their stake holders. In short, there is a virtual vacuum in the literatures about cooperative entrepreneurship. In this context, this book attempts to provide a theoretical background on cooperatives in Indian context and will serve as base for further research into this field of study. This book is useful for students, teachers, and trainers in Cooperation, Rural Development, and Third Sector Enterprises.

The degree of development reached by cooperatives of different sectors throughout the world, which among others led to the UN declaring 2012 as the International Year of Cooperatives, needs to be accompanied by a similar development of corresponding legislation. To this end, a better knowledge of cooperative law from the comparative point of view, as has already been established for other types of enterprises, becomes of great importance. This book strives to fill this gap, and is divided into four parts. The first part offers an analytic and conceptual framework with which to understand, study and assess cooperative law from a transnational and comparative perspective. The second part includes several chapters dealing with attempts to harmonize cooperative laws. The third part contains an overview of more than 30 national cooperative laws, while the last part summarizes and compares these national cooperative laws, thus laying the foundation for a comparative cooperative law doctrine.
