Sir Peter Estlin is an independent director of Rothschild & Co as well as Chair of FutureDotNow, a coalition of businesses and organisations working together to boost digital skills across the UK.

Tucked among the great pioneer destinations on the Oregon Trail is the fertile agricultural area of the Willamette Valley. Today the valley forms the cultural and political heart of Oregon and is home to three-quarters of the state's population. The beginning of the 20th century saw the entrance of Filipinos into the valley, arriving from vegetable farms in California and Washington, fish canneries in Alaska, and from the pineapple and sugar plantations in Hawaii. At the same time, the U.S. territorial government in the Philippines started sponsoring Filipino students, beginning in 1903, to study in the United States. Oregon's two biggest centers of education, today's University of Oregon in Eugene and Oregon State University in Corvallis, became home to Filipinos from the emerging independent Philippine nation. They were mostly male, the children of wealthy Filipinos who had connections. Most of them returned to the Philippines upon graduation; some stayed and created a new life in America.

Islam's tense relationship with modernity is one of the most crucial issues of our time. Within Islamic legal systems, with their traditional preference for eyewitness testimony, this struggle has played a significant role in attitudes toward expert witnesses. Utilizing a uniquely comparative approach, Ron Shaham here examines the evolution of the role of such witnesses in a number of Arab countries from the premodern period to the present. Shaham begins with a history of expert testimony in medieval Islamic culture, analyzing the different roles played by male experts, especially physicians and architects, and females, particularly midwives. From there, he focuses on the case of Egypt, tracing the country's reform of its traditional legal system along European lines beginning in the late nineteenth century. Returning to a broader perspective, Shaham draws on a variety of legal and historical sources to place the phenomenon of expert testimony in cultural context. A truly comprehensive resource, *The Expert Witness in Islamic Courts* will be sought out by a broad spectrum of scholars working in history, religion, gender studies, and law.

Power System Operation and Control is comprehensively designed for undergraduate and postgraduate courses in electrical engineering. This book aims to meet the requirements of electrical engineering students and is useful for practicing engineers.

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.
