The beauty of the country through which he travelled (it was the county Wicklow) could not prevent his mind from dwelling on many painful thoughts, some borrowed from the past, and more from the future. His uncle's caprice and moroseness, the strange reports concerning the cause of the secluded life he had led for many years, his own dependent state, fell like blows fast and heavy on his mind. He roused himself to repel them, sat up in the mail, in which he was a solitary passenger, looked out on the prospect, consulted his watch; then he thought they receded for a moment, but there was nothing to fill their place, and he was forced to invite them back for company. When the mind is thus active in calling over invaders, no wonder the conquest is soon completed. As the carriage drew near the Lodge, (the name of old Melmoth's seat), John's heart grew heavier every moment. The recollection of this awful uncle from infancy, when he was never permitted to approach him without innumerable lectures, not to be troublesome, not to go too near his uncle, not to ask him any questions, on no account to disturb the inviolable arrangement of his snuff-box, hand-bell, and spectacles, nor to suffer the glittering of the gold-headed cane to tempt him to the mortal sin of handling it, and, finally, to pilot himself aright through his perilous course in and out of the apartment without striking against the piles of books, globes, old newspapers, wig-blocks, tobacco-pipes, and snuff-cannisters, not to mention certain hidden rocks of rat-traps and mouldy books beneath the chairs, together with the final reverential bow at the door, which was to be closed with cautious gentleness, and the stairs to be descended as if he were shod with felt. This recollection was carried on to his school-boy years, when at Christmas and Easter, the ragged poney, the jest of the school, was dispatched to bring the reluctant visitor to the Lodge, where his pastime was to sit vis-a-vis to his uncle, without speaking or moving, till the pair resembled Don Raymond and the ghost of Beatrice in the Monk, then watching him as he picked the bones of lean mutton out of his mess of weak broth, the latter of which he handed to his nephew with a needless caution not to take more than he liked, then hurried to bed by day-light, even in winter, to save the expence of an inch of candle, where he lay awake and restless from hunger, till his uncle's retiring at eight o'clock gave signal to the governante of the meagre household to steal up to him with some fragments of her own scanty meal, administering between every mouthful a whispered caution not to tell his uncle. Then his college life, passed in an attic in the second square, uncheered by an invitation to the country; the gloomy summer wasted in walking up and down the deserted streets, as his uncle would not defray the expences of his journey; the only intimation of his existence, received in quarterly epistles, containing, with the scanty but punctual remittance, complaints of the expences of his education, cautions against extravagance, and lamentations for the failure of tenants and the fall of the value of lands. All these recollections came over him, and along with them the remembrance of that last scene, where his dependence on his uncle was impressed on him by the dying lips of his father.

"Chapter Goals" and "Chapter Goals Revisited" are two new features in this revision. Each chapter starts with a list of goals that allows students to see what is ahead. The chapter concludes with a repetition of that list with summary information added. General ChemistryNow is correlated to this list. New to this edition are dozens of "Active Figures" to help students visualize chemistry in action. These animated versions of text art help students master key concepts from the book. "Active Figures" can be used as demonstrations in the classroom and each figure is paired with a guided exploration and exercise to ensure students understand the concept being illustrated. In-text worked "Examples" follow a four-part structure: "Problem" statement, "Strategy" for approaching the problem, fully worked "Solution," and, where appropriate, a "Comment" on the problem and solution. Through this approach, students learn how to approach a problem rather than merely learning to memorize problem types and memorized solution approaches. Exercises appear throughout the text so students can check their comprehension of the material. Answers are in an appendix. "Problem-Solving Tips" provide readers tips for determining how to approach and solve problems. "Chemical Perspectives" are essays that bring relevance and perspective to a study of chemistry. In order to put chemistry in its historical context, "Historical Perspective" essays describe the people who were key to developing the concepts of the chapter. "A Closer Look" essays describe ideas that form the background to material under discussion or provide another dimension of the subject. - Publisher.
