When a babysitter classmate overhears through a baby monitor that someone may be in trouble, Norah and Darcy, assisted by junior detective agency newcomer Fiona, follow a series of clues before making a shocking discovery.

"Reveals a sensible way to rebuild public education and close the achievement gap for all students. Indeed, this is already happening in a most unlikely place: Union City, New Jersey, a poor, crowded Latino community just across the Hudson from Manhattan. Kirp explores the game-changing reasons behind Union City's successful schools, including quality early education, a word-soaked curriculum, and hands-on help for teachers. Improbable scholars offers a playbook for reform that will dramatically change our approach to reviving public education"--

WHO'S OUT THERE? Norah and Darcy's detective agency, Partners in Crime, is taking on new and chilling case. The girls' classmate, Maya, is hearing strange, crackling voices coming over the baby monitor while she's babysitting late at night. Maya is worried someone might be in danger. To help investigate, Norah and Darcy join her for a sleepover stakeout. In between eating snacks and watching TV, the girls are on high alert for anything suspicious. Soon, they stumble upon a mysterious secret they never could have imagined - but Norah and Darcy clash over how to interpret the new clues. Can the girls get past their differences to see their way to the truth?

SharePoint 2007 Development Recipes offers a range of ready-to-use code recipes that provide the building blocks for solving many common SharePoint 2007 programming dilemmas. This practical, hands-on guide categorizes recipes by problem area, for example site management, event handlers, users, lists, and web parts, and source code is provided in both VB and C#. As well as providing an invaluable reference, Mark Gerow also includes clear, supporting guidelines to help you modify the code samples for the broadest range of applications. For each recipe you will find Background and design considerations Source code in both VB and C# Discussion of variations on the provided examples Cross-reference to core SharePoint classes If you find yourself asking, "How do I solve this SharePoint development problem?" you will find all the answers in Mark Gerow's supremely useful book.

50 Powerful, Easy-to-Use Rules for Supporting Hypergrowth in Any Environment Scalability Rules is the easy-to-use scalability primer and reference for every architect, developer, web professional, and manager. Authors Martin L. Abbott and Michael T. Fisher have helped scale more than 200 hypergrowth Internet sites through their consulting practice. Now, drawing on their unsurpassed experience, they present 50 clear, proven scalability rules and practical guidance for applying them. Abbott and Fisher transform scalability from a black art to a set of realistic, technology-agnostic best practices for supporting hypergrowth in nearly any environment, including both frontend and backend systems. For architects, they offer powerful new insights for creating and evaluating designs. For developers, they share specific techniques for handling everything from databases to state. For managers, they provide invaluable help in goal-setting, decision-making, and interacting with technical teams. Whatever your role, you'll find practical risk/benefit guidance for setting priorities and getting maximum bang for the buck. Simplifying architectures and avoiding over-engineering Scaling via cloning, replication, separating functionality, and splitting data sets Scaling out, not up Getting more out of databases without compromising scalability Avoiding unnecessary redirects and redundant double-checking Using caches and content delivery networks more aggressively, without introducing unacceptable complexity Designing for fault tolerance, graceful failure, and easy rollback Striving for statelessness when you can; efficiently handling state when you must Effectively utilizing asynchronous communication Learning quickly from mistakes, and much more
