The American edition of the revelatory Swedish book Spotify Untold, the basis of the new Netflix Original series slated for 2022! "Two excellent Swedish journalists recount the historic rise of the company that changed modern music not just as a riveting business tale, but as a lesson in tech geopolitics. Spotify 's Daniel Ek shows why Silicon Valley does not always win. "—David Kirkpatrick, New York Times bestselling author of The Facebook Effect Steve Jobs tried to stop this moment from ever happening. Google and Microsoft made bids to preempt it. The music industry blocked it time and again. Yet, on a summer's eve in 2011, the whiz kid CEO of a Swedish start-up celebrated his company's US launch. In the midst of the Apple-Android tech war and a music label crusade against piracy and illegal downloading, Spotify withdrew the battle lines, sent shockwaves through Silicon Valley, and got the hardline executives at Universal, Sony, and Warner to sign with its "free-mium" platform. In The Spotify Play, now adapted into an upcoming Netflix Original series, Swedish investigative tech journalists Sven Carlsson and Jonas Leijonhufvud, who covered the company from its inception, draw upon hundreds of interviews, previously untapped sources, and in-depth reporting on figures like Mark Zuckerberg, Sean Parker, Steve Jobs, Taylor Swift, Jay-Z, Pony Ma Huateng, and Jimmy Iovine. They have captured the riveting David vs. Goliath story of a disruptive innovator who played the industry giants in a quest to revolutionize the consumption of sound, building today's largest online source of audio, with more than 50 million songs, one million-plus podcasts, and over 300 million users.

The history of flight control cannot be considered separately to the history of aviation. Since the early days, the conception of automatic flight control systems has advanced from mechanical control systems to greatly developed automatic fly-by-wire flight control systems which can be found in military jets and civil airliners these days. Even today, several research attempts are made for the further advancement of these flight control systems in numerous aspects. Current advancements in this area target a variety of different aspects. This book presents a collection of knowledge on important research areas, like inertial navigation, handling of unmanned airplanes and helicopters, trajectory control of an unmanned space re-entry automobile, aeroservoelastic control, modifying flight control, and error tolerant flight control. It discusses theoretical outlook and current conceptual advancements in flight control systems along with describing theories of modified and fault-tolerant flight control systems. Each technique has been elaborated using illustrations and appropriate examples.

As the funding of journalism moves centre stage as a driver in shaping the new trajectories of journalism in the digital age, this book focuses on how those working in sports journalism have had to adapt and re-invent themselves. Running through this international collection are key themes related to sports journalism in the digital environment. These include aspects of disruption to: established norms of journalistic practice; institutional allegiance; the authority and primary definer role of journalism; and the career structure and development for journalists writing about sport. The book draws on empirically-led research that mixes qualitative and quantitative approaches and seeks to better understand and position what is going on across contemporary sports journalism. In so doing, this collection identifies change, but also areas of continuity as well as new opportunities for journalists. This book was originally published as a special issue of Digital Journalism.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £ 10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.
