If you are a developer with a good command and knowledge of creating dashboards, but are not yet an advanced user of SAP BusinessObjects Dashboards, then this is the perfect book for you. Prerequisites include a good working knowledge of Microsoft Excel as well as knowledge of basic dashboard practices.

Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, *Better Presentations* details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—*Better Presentations* describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument for maximum engagement and persuasion. With a range of clear examples for what to do (and what not to do), the practical package offered in *Better Presentations* shares the best techniques to display work and the best tactics for winning over audiences. It pushes presenters past the frustration and intimidation of the process to more effective, memorable, and persuasive presentations.

Now more than ever, content must be visual if it is to travel far. Readers everywhere are overwhelmed with a flow of data, news, and text. Visuals can cut through the noise and make it easier for readers to recognize and recall information. Yet many researchers were never taught how to present their work visually. This book details essential strategies to create more effective data visualizations. Jonathan Schwabish walks readers through the steps of creating better graphs and how to move beyond simple line, bar, and pie charts. Through more than five hundred examples, he demonstrates the do's and don'ts of data visualization, the principles of visual perception, and how to make subjective style decisions around a chart's design. Schwabish surveys more than eighty visualization types, from histograms to horizon charts, ridgeline plots to choropleth maps, and explains how each has its place in the visual toolkit. It might seem intimidating, but everyone can learn how to create compelling, effective data visualizations. This book will guide you as you define your audience and goals, choose the graph that best fits for your data, and clearly communicate your message.

This book - the first comprehensive study of Marimekko designs - presents more than one hundred examples of exuberant Marimekko fashions and home furnishings that gave the company a definitive presence on the world design stage.

More than 6 years after his death David Halberstam remains one of this country's most respected journalists and revered authorities on American life and history in the years since WWII. A Pulitzer Prize-winner for his ground-breaking reporting on the Vietnam War, Halberstam wrote more than 20 books, almost all of them bestsellers. His work has stood the test of time and has become the standard by which all journalists measure themselves. Bill

Belichick's thirty-one years in the NFL have been marked by amazing success--most recently with the New England Patriots. In this groundbreaking book, *THE EDUCATION OF A COACH*, David Halberstam explores the nuances of both the game and the man behind it. He uncovers what makes Bill Belichick tick both on and off the field.

Published on the 70th anniversary of the Marimekko brand, this book surveys the classic design collaborations, patterns, and vibrant textiles from the much-loved Finnish lifestyle design house

The 13th Symposium on the Interface continued this series after a one year pause. The objective of these symposia is to provide a forum for the interchange of ideas of common concern to computer scientists and statisticians. The sessions of the 13th Symposium were held in the Pittsburgh Hilton Hotel, Gateway Center, Pittsburgh. Following established custom the 13th Symposium had organized workshops on various topics of interest to participants. The workshop format allowed the invited speakers to present their material variously as formal talks, tutorial sessions and open discussion. The Symposium schedule was also the customary one. Registration opened in late afternoon of March 11, 1981 and continued during the opening mixer held that evening: The formal opening of the Symposium was on the morning of March 12. The opening remarks were followed by Bradley Efron's address "Statistical Theory and the Computer." The rest of the daily schedule was three concurrent workshops in the morning and three in the afternoon with contributed poster sessions during the noon break. Additionally there were several commercial displays and guided tours of Carnegie-Mellon University's Computer Center, Computer Science research facilities, and Robotics Institute.

NOW IN FULL COLOR! Written by sought-after speaker, designer, and researcher Stephanie D. H. Evergreen, *Effective Data Visualization* shows readers how to create Excel charts and graphs that best communicate their data findings. This comprehensive how-to guide functions as a set of blueprints—supported by both research and the author's extensive experience with clients in industries all over the world—for conveying data in an impactful way. Delivered in Evergreen's humorous and approachable style, the book covers the spectrum of graph types available beyond the default options, how to determine which one most appropriately fits specific data stories, and easy steps for building the chosen graph in Excel. Now in full color with new examples throughout, the Second Edition includes a revamped chapter on qualitative data, nine new quantitative graph types, new shortcuts in Excel, and an entirely new chapter on *Sharing Your Data With the World*, which provides advice on using dashboards. New from Stephanie Evergreen! *The Data Visualization Sketchbook* provides advice on getting started with sketching and offers tips, guidance, and completed sample sketches for a number of reporting formats. Bundle *Effective Data Visualization, 2e*, and *The Data Visualization Sketchbook*, using ISBN 978-1-5443-7178-8!

*Technical Drawing for Fashion* explains how to create a technical fashion drawing using a simple and straightforward step-by-step method, explained for those who wish to use Adobe Illustrator as well as for those who prefer to draw by hand. The second part of the book presents over 600 technical drawings of garment types, styles and construction details, the basic key shapes of which are shown alongside a specially created and photographed calico toile. Accompanying each illustration is a list of all the terms by which that garment is known. This unique presentation illustrates the relationship between the three dimensional
