Effective management in today's competitive business environment requires solid leadership skills for which companies often don't provide adequate training. Managerial Leadership fills that void, providing a four-tiered approach that helps professionals from all walks of life develop both strong management and leadership skills. Top leadership models and frameworks, tools for assessing leadership strengths, techniques for handling change and growth, and more make Managerial Leadership a veritable learning laboratory.

Leadership: The Art of Experience, Fifth Edition, is written for the general student to serve as a stand-alone introduction to the subject of leadership. The text consists of 13 chapters and a final section on Basic and Advanced Leadership Skills. Authors Hughes, Ginnett, and Curphy have drawn upon three different types of literature: empirical studies; interesting anecdotes, stories and findings; and leadership skills to create a text that is personally relevant, interesting and scholarly. The authors' unique quest for a careful balancing act of leadership materials help students apply theory and research to their real-life experiences.

This accessible guide to leadership encourages the reader to proactively develop themselves, their colleagues and their organisation.

This book examines the nature of successful school leadership - what is it, what does it look like in practice and what are the consequences for schools and pupils. As well as providing a contemporary overview of international research and thinking about successful school leadership, it identifies similar and distinguishing features of successful leadership in different sectors; between heads of different experience; and between schools in different socio-economic circumstances. It introduces the notions of 'layered leadership' and 'progressive trust' as key features of successful leadership. Additionally it discusses issues of sustainability and resilience in successful school leadership. Finally it considers how successful school leadership connects to pupil success, exploring the leadership strategies used by successful heads in a range of primary and secondary schools whose pupil attainment results had improved over a three year period during their headship.

These quick reads, based on McGraw-Hill bestsellers, are designed to meet the needs of busy people. Titles in the series focus on each book's main themes and action ideas, reduced to a manageable page count for on-the-go readers. A workplace-tested prescription for encouraging the behaviors and key drivers of effective leadership, from one of today's top training teams.

The Art of Leadership, 5th edition is based on two ideas. Leadership will take place to the extent the leader cares about the work to be done. Equally important, the leader must care about people. Neither of these qualities is sufficient without the other, and neither can be false. People know when the leader cares. When the leader is committed to the task and is concerned about people, these qualities serve as magnets and motivators to followers, and their potential for achievement becomes enormous. Leadership is an art that can be developed through mastery of nine key areas of success. The successful leader must possess knowledge and skills in the following areas: understanding leadership variables, the power of vision, the importance of ethics, the empowerment of people, leadership principles, understanding people, multiplying effectiveness, developing others, and performance management. The difference between most other leadership texts and The Art of Leadership, 5th edition can be compared to the difference between a lecture and a seminar. Although both are good educational vehicles, the lecture is better for conveying large amounts of information, while the seminar is better for developing skills and attitudes. A good lecture is interesting and builds knowledge, while a good seminar is stimulating and builds competency. Without sacrificing either theoretical foundation or important content, the fifth edition of The Art of Leadership emphasizes the interactive, seminar approach to learning.
