Bill Evans (1929-1980) is one of the highest regarded jazz pianists in the history of jazz. His harmonic and rhythmic language in combination with superb taste and technical perfection places him in a category by himself. His style of harmonization and improvisation has been an inspiration to countless pianists as well as other instrumentalists in the field of jazz. This book of original musical studies and analyses by Corey Christiansen and Per Danielsson is designed to help you develop your own personal improvising style. It presents numerous musical lines with chord symbols in the style of Bill Evans, grouped by the harmony they can be used against. The audio play-along provides a rhythm section backup for each of the exercises. To help the player master all keys, each section also has a play-along on the audio that modulates around the circle of fourths. Some of the techniques used in the style of Bill Evans are discussed and examples shown, helping musicians analyze each of the ideas presented, further insuring mastery of these ideas. When assimilated into the student's musical vocabulary, these ideas will help students create their own original jazz solos. Includes access to online audio. Also available in Japanese from ATN, Inc

In 1853 Robert Schumann identified fully-formed compositional mastery in the young Brahms, who nevertheless in the years following embarked on a period of intensive further study, producing, among other works, the neo-baroque Sarabande and Gavotte. These dances have not been properly recognized as constituting a distinct Brahms work before now, but manuscript evidence and their performance history indicate that Brahms and his friends thought of them as such in the mid-1850s, when they became the first music of his performed publicly in Gdansk, Vienna, Budapest and London. He later suppressed the dances, using them instead as a thematic quarry for three chamber music masterpieces, from different stages in his life and in distinctly different ways: the Second String Sextet, the First String Quintet and the Clarinet Quintet. This book gives an account of the compositional and performance history, stylistic features and re-uses of the dances, setting these in the wider context of Brahms ' s developing creative concerns and trajectory. It constitutes therefore a study of a lost work, of how a fully-formed master opens himself to the in-flowing from afar (in Martin Heidegger ' s terms), and of the transformative reach and concomitant expressive richness of Brahms ' s creative thought.

Analytical and Cross-Cultural Studies in World Music presents intriguing explanations of extraordinary musical creations from diverse cultures across the world. All the authors are experts, deeply engaged in the traditions they describe. They recount the contexts in which the music is created and performed, and then hone in on elucidating how the music works as sound in process. Accompanying the explanatory prose is a wealth of diagrams, transcriptions, recordings, and (online) multimedia presentations, all intended to convey the richness, beauty, and ingenuity of their subjects. The music ranges across geography and cultures--court music of Japan and medieval Europe, pagode song from Brazil, solos by the jazz pianist Thelonius Monk and by the sitar master Budhaditya Mukherjee, form-and-timbre improvisations of a Boston sound collective, South Korean folk drumming, and the ceremonial music of indigenous cultures in North American and Australia--much of which has never been so thoroughly analyzed before. Thus the essays diversify and expand the scope of this book's companion volume, Analytical Studies in World Music, to all inhabited continents and many of its greatest musical traditions. An introduction and an afterword point out common analytical approaches, and present a new way to classify music according to its temporal organization. Two special chapters consider the juxtaposition of music from different cultures: of world music traditions and popular music genres, and of Balinese music and European Art music, raising provocative questions about the musical encounters and fusions of today's interconnected world. For everyone listening in wonderment to the richness of world music, whether listener, creator, or performer, this book will be an invaluable resource and a fount of inspiration.
