The second edition of Multiple Choice Questions on Renewable Energy explores renewable energy sector in a multiple choice question format. It contains more than 1500 questions that focus on solar, wind, biomass, biogas, biofuels, hydro, energy from wastes, hydrogen, geothermal, ocean, tidal, and waves. Similar to the previous edition, this edition too has three levels of questions. The book provides a comprehensive overview of renewable energy development in India. This book is useful for academicians, students pursuing engineering or agriculture-related courses, aspirants of various competitive exams, professionals, and stakeholders in the renewable energy sector. It can also be used for quiz programmes organized in schools, universities, engineering institutions, and on television.

Multiple Choice Questions on Oil, Gas and Petrochemicals includes over 1500 questions covering the the exploration of oil and gas, refining of oil, natural gas and petrochemical sectors. The book is useful for students pursuing their Bachelor's or Master's Degree in petroleum exploration and for the professionals working in upstream, midstream and downstream sector of oil and gas. The book would also be used by various academic institutions and libraries.

An internal combustion engine (ICE) is a heat engine in which the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine. The force is applied typically to pistons, turbine blades, a rotor, or a nozzle. This force moves the component over a distance, transforming chemical
