Explains theories relating to the creation of the universe including Kepler's three laws of motion, Einstein's theory of relativity, and the Steady State and Big Bang theories.

This anthology makes available in modern spelling substantial Catholic contributions to literature, history, political thought, devotion, and theology in the sixteenth and seventeenth centuries. It presents silenced voices and redefines the culture of Early Modern England including such figures as Shakespeare, Donne, Spenser, Milton, and Jonson.

This dictionary explores the language of domestic life found in Shakespeare's work and seeks to demonstrate the meanings he attaches to it through his uses of it in particular contexts. "Domestic life" covers a range of topics: the language of the household, clothing, food, family relationships and duties; household practices, the architecture of the home, and all that conditions and governs the life of the home. The dictionary draws on recent cultural materialist research to provide in-depth definitions of the domestic language and life in Shakespeare's works, creating a richly rewarding and informative reference tool for upper level students and scholars.

Over the last two decades there has been a resurgence of theatrical interest in Shakespeare's *Pericles*, which has been rescued from comparative neglect and is now frequently performed. This development is charted in the introduction to this edition, which differs radically from any other currently available. Doreen DelVecchio and Antony Hammond reject the current orthodoxies that the text is seriously corrupt and that the play is of divided authorship. They show how the 1609 quarto has features in common with the first quarto of *King Lear*, now widely regarded as being based on Shakespeare's manuscript. Likewise they regard the arguments concerning divided authorship as unproven and misleading. Instead they show the play to be a unified aesthetic experience.
