‘A Khushwant Singh short story is not flamboyant but modest, restrained, well-crafted...Perhaps his greatest gift as a writer is a wonderful particularity of description’—London Magazine Khushwant Singh first established his reputation as a writer through the short story. His stories—wry, poignant, erotic and, above all, human—bear testimony to Khushwant Singh’s remarkable range and his ability to create an unforgettable PBI - World. Spanning over half a century, this volume contains all the short stories Khushwant Singh has ever written, including the delightfully tongue-in-cheek ‘The Maharani of Chootiapuram’, written in 2008.

‘Khushwant’s stories enthrall...[He has]an ability akin to that of Somerset Maugham...the ability to entertain intelligently’—PBI - India Today ‘His stories are better than [those of] any PBI - Indian writing in English—Times of PBI - India ‘The Collected Short Stories leaves the reader in a delightful, inebriated trance’—Sunday Chronicle ‘He is not an ordinary short story writer...[Collected Stories] is delightful reading’—Hindustan Times

Hormonal Proteins and Peptides: Corticotrophin (ACTH) is a collection of papers dealing with the chemistry and biology of adrenocorticotrophic hormone (ACTH). One paper describes the structure-function studies made on ACTH, with reference to the steroidogenic activity of synthetic ACTH fragments and analogs. The paper also discusses the melanocyte-stimulating hormone (MSH) activity, as well as the behavioral effects among the extraadrenal properties of ACTH. Some problems related to ACTH receptors include the role of extracellular calcium and the characterization of ACTH receptors in fetal and adult human adrenocortical cells. Another paper describes ACTH synthesis in the pituitary and extrapituitary tissues. One paper analyzes the role of ACTH in the regulation process concerning the production of steroid hormones, particularly, on the generation of glucocorticoids. Glucocorticoids are the characteristic

products of the zona fasciculata. Another paper shows that the steady-state level of ACTH synthesis and release are due to the effects of stimulatory factors such as CRF and inhibitory hormones (namely, the glucocorticoids on the corticotroph). The maintenance of responsiveness of ACTH-secreting cells (as a response to individual stress in humans) can be a manifestation of an inherent molecular characteristic. This collection will prove valuable to microbiologists, biotechnologists, and academicians connected with the biological sciences.
