Contains general information for technicians on the specifications, MIL resetting and DTC retrieval, accessory drive belts, timing belts, brakes, oxygen sensors, electric cooling fans, and heater cores of twenty-one types of import cars.

A lively, evocative, authoritative dictionary of words from the world community of flight, this book expresses the machismo, the terror, the care for technical excellence, struggles over the power of naming between PR for manufacturers and others, reporters, flight crews, ramp rats, PAX, cabin attendants. The exhilaration of a "blue on blue" flying day, the horror of a "ground loop" that goes bad, or a "torque stall." Pilots, at the center, are extreme individualists in an activity that depends on teamwork – mechanics, weather forecasters, air traffic controllers, computer experts, schedulers and trackers, dispatchers, ground crew. The stress produces variations in speaking that range from technical words to vivid slang exclamations (see "Jesus nut"). Sources include people from all the levels listed above, some aviation and space writers, Gulf War veterans, and required on-site research at air shows in Le Bourget, Farnborough, Berlin, Ottawa, Abbotsford, and in Dayton, Pensacola (FL), CFB St. Hubert (Qc.), Dallas-Fort Worth, Renton (WA), Wichita (KS), Montreal, and at such WWII bases as Elvington, near York, England. The section on the names of aircraft includes both official names and the folk names given by those who actually had to fly or ride in them. "I am amazed at how you have covered up all the profanity and kept such a clean book. You have made [this] look like a respectable language!" Bill Robinson, Public Relations

This text explains the concepts behind process design. It uses a case study approach, guiding readers through realistic design problems, and referring back to these cases at the end of each chapter. Throughout, the author uses shortcut techniques that allow engineers to obtain the whole focus for a design in a very short period (generally less than two days).

The most trustworthy source of information available today on savings and investments, taxes, money management, home ownership and many other personal finance topics.

Featuring profiles and photos of over 170 passenger cars, minivans, and four-wheel drive vehicles available for 1999, this book includes the latest suggested retail and dealer-invoice prices for all models.

The aim of this book is to help students write mathematics better. Throughout it are large exercise sets well-integrated with the text and varying appropriately from easy to hard. Basic issues are treated, and attention is given to small issues like not placing a mathematical symbol directly after a punctuation mark. And it provides many examples of what students should think and what they should write and how these two are often not the same.
