In de afgelopen twee jaar zijn beleggingsexperts nog nooit zo optimistisch geweest als nu. Dat blijkt uit de maandelijkse Beursenquête van Corné van Zeijl.

This publication focuses on quality issues in early childhood education and care: it aims to define quality and outlines five policy levers that can enhance it.

First in-depth analysis of broadband developments in Europe, combining qualitative and quantitative analysis, with chapter contributions provided by in-country experts.

This book offers both a theoretical and empirical examination of elite education, at all stages from the early years to university level. The book explores the various manifestations of internationalisation of education; the implications of these for national education systems; the formation and re-articulation of elite forms of education locally and globally; and how these facilitate the reproduction or disruption of processes of inequality. The collection critically considers these questions by drawing on contributions from around the world, and focuses on how internationalisation processes shape the various stages of the education system – from early years settings to higher education – in oftentimes quite different ways. At the same time, by engaging with the issues through a range of theoretical lenses, the book invites readers to consider in greater depth the various ways we can come to understand how processes of internationalisation are both embedding but also at times destabilising the formation and purpose of elite education provision and potentially the configuration of elite groups themselves. The book will be relevant to academics, researchers, students, policymakers and educators working in or on the field of 'education' across the world.

Finally, a book that crosses the great divide between academia and practice a rare feat, especially in edited volumes with scholarly contributions. . . there is much to like about what the book does cover. Wayne Visser, Ethical Performance Mallin brings together academics and business experts to share a wide range of accounts from across the globe. Readers will find insights and guidance on how countries and companies have tried to balance the perceived needs of often disparate groups. James McRitchie, CorpGov.net Chris Mallin has put together a fine volume providing detailed insights into the global spread of CSR. It wonderfully showcases the diversity and dynamics of CSR in different countries, regions and key industries. It is an essential read for everybody interested in the dialectics of global homogenization and local adaptation of CSR-related management practices. Dirk Matten, York University, Toronto, Canada Professor Mallin has edited a remarkable range of studies, illustrating how companies across the world regard and respond to their social responsibilities. Her book will prove an invaluable source of information for everyone interested in comparative corporate social responsibility, aided by the admirable learning points and questions following each case study. It will also be turned to for guidance by investors concerned to promote corporate social values internationally. Sir Adrian Cadbury, Aston University Business School, Birmingham, UK Corporate Social Responsibility (CSR) is an area of increasing global interest with companies taking CSR issues more seriously, devoting more resources to such issues and acknowledging the benefits of CSR activities. This insightful book provides a comprehensive analysis of the development of CSR in a diverse range of countries including the UK, Italy, Poland, Turkey, the USA, the Middle East, Australia, Japan and Korea. Christine Mallin has brought together leading experts from both academia and the business world to provide fully up-to-date accounts of developments in CSR from a range of legal, cultural and economic perspectives. This timely resource

will serve as an invaluable teaching and resource tool for advanced students and academics and will provide insights and guidance to the wider business community.

This book comprehensively surveys the colorful history of mass hysteria and kindred phenomena in schools, documenting outbreaks of demonic possession during witchcraft scares, to modern incidents of collapsing bands, itching frenzies, ghost panics and mystery illnesses. Strange behaviors and illnesses in students are examined through the centuries. Possessed children went into trance states and began to bark like dogs in 16th and 17th century Holland; an epidemic of twitching, trembling and blackout spells swept through European schools during the latter 1800s; an outbreak of Tourette's-like symptoms struck schoolgirls in western New York in 2011-12. In addition to the US and Europe, separate chapters detail accounts from Asia, Africa, Latin America and Oceania. A variety of theories to explain outbreaks are examined.
