During and after the English civil wars, between 1640 and 1690, an unprecedented number of manuals teaching cryptography were published, almost all for the general public. While there are many surveys of cryptography, none pay any attention to the volume of manuals that appeared during the seventeenth century, or provide any cultural context for the appearance, design, or significance of the genre during the period. On the contrary, when the period's cryptography writings are mentioned, they are dismissed as esoteric, impractical, and useless. Yet, as this book demonstrates, seventeenth-century cryptography manuals show us one clear beginning of the capitalization of information. In their pages, intelligence—as private message and as mental ability—becomes a central commodity in the emergence of England's capitalist media state. Publications boasting the disclosure of secrets had long been popular, particularly for English readers with interests in the occult, but it was during these particular decades of the seventeenth century that cryptography emerged as a permanent bureaucratic function for the English government, a fashionable activity for the stylish English reader, and a respected discipline worthy of its own genre. These manuals established cryptography as a primer for intelligence, a craft able to identify and test particular mental abilities deemed "smart" and useful for England's financial future. Through close readings of five specific primary texts that have been ignored not only in cryptography scholarship but also in early modern literary, scientific, and historical studies, this book allows us to see one origin of disciplinary division in the popular imagination and in the university, when particular broad fields—the sciences, the mechanical arts, and the liberal arts—came to be viewed as more or less profitable.

A glorious exercise in cheeky punmanship, *The Wonderful Wonder of Wonders* sees Jonathan Swift in fine scatological form. Flying by the seat of his pants, the great author treats us to a condensed biography of his posterior, enlivened by some inspired wordplay. Most famous for his celebrated masterpiece, *Gulliver's Travels*, Swift was the foremost satirist of his day. Also including a selection of Swift's other lesser-known works, and a very peculiar proposal to make money from public toilets, this volume will be a hilarious and illuminating read for any fans of Ireland's most illustrious wit.

Designed to give readers a simple but accurate idea of a Latin expression, this dictionary compiles, translates, and briefly explains the phrases found in theological writings and canon law that may puzzle readers unfamiliar with Latin or the theological meaning and nuances of these terms. Consecrated phrases refer to expressions which are used, often in shorthand manner, to express a certain theological position or thought, which express a significant position of Roman Catholic sacramental theology as defined at the Council of Trent. Often these terms appear in a given theological text with little or no translation or explanation. *Consecrated Phrases* provides that explanation in concise and understandable language. Entries are listed according to the form most likely to be used in the expressions themselves as found in theological writings. Each entry begins with a "literal" translation of the Latin term or phrase and then provides a brief explanation on the theological meaning or significance of the term. While most of the entries contain theological, liturgical, canonical, or philosophical terms primarily from the Roman Catholic tradition, important expressions in the various Protestant traditions are also included, as well as a number of common classical aphorisms, Latin titles of many Church documents, and some common scholarly abbreviations. *Consecrated Phrases* is a valuable reference for anyone interested in theology at all levels. For anyone working in Christian theology who lacks this degree of linguistic sophistication, *Consecrated Phrases* is a welcome desk aid. Catholic Library World "James Bretzke's Latin theological dictionary should be in every theological student's basic reference library. . . . The definitions are clearly and concisely written and Bretzke uses excellent examples to illustrate some of the more difficult concepts." Robert E. Manning, S.J., President Weston Jesuit School of Theology "This new reference work fills a void as no other theological work has in a very handy, accessible and satisfying way. Students have been asking for a book like this for years. This new dictionary should become a standard resource in every theological student's reference library." Richard M. Gula, S.S. Professor of Moral Theology Franciscan School of Theology, Berkeley

As novice master of the Cistercian Abbey of Our Lady of Gethsemani in Kentucky, Thomas Merton presented weekly conferences to familiarize his charges with the meaning and purpose of the vows they aspired to undertake. In this setting, he offered a thorough exposition of the theological, canonical, and above all spiritual dimensions of the vows. Merton set the vows firmly in the context of the anthropological, moral, soteriological, and ecclesial dimensions of human, Christian, and monastic life. He addressed such classical themes of Christian morality as the nature of the human person and his acts; the importance of justice in relation to the Passion of Christ, to friendship and to love; and self-surrender as the key to grace, prayer and the vowed life. Merton's words on these topics clearly spring from a committed heart and often flow with the soaring intensity of style that we have come to expect in his more enthusiastic prose. The texts of these conferences represent the longest and most systematically organized of any of numerous series of conferences that Merton presented during the decade of his mastership. They may be the most directly pastoral work Merton ever wrote.

Farmer extends and deepens the understanding of urban poverty in the high middle ages. She explores the ways in which cultural elites thought about the poor and shows that their conceptions of poor men and women were derived from the roles assigned to men and women in the opening chapters of the Book of Genesis -

men are associated with productive labour; of labour within the public realm, and women with reproductive labour; or labour within the private realm.
