Half of Americans fear falling more than cancer and want to age in home without stairs

A curvy and dangerous road in Luzerne County is becoming a nightmare for neighbors. Another truck crash this week adds to the frustration and now the mayor is stepping up his fight to get it changed ...

Seeking solutions for dangerous roadway in Luzerne County

Vihaan said the success of One Step Greener should serve as a lesson for world leaders tackling climate change and pollution. “You have to be practical and think of solutions that are easy for p ...

Presents a series of simple, easy-to-implement solutions to dealing with the clutter of everyday life, explaining how to assess accumulated junk and eliminate the excess, shop for containers, label jars and boxes, create a proper place for everything in every room in the house, and alleviate the messy habits of a lifetime.

- New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Green living begins at home, and *New Green Home Solutions* tells you how. Most of the energy-derived pollution we produce comes as a direct result of our homes - how we heat them, how we cool them, how we keep them well-lit and full of things that make our lives so comfortable. The good news is that we have tremendous power to create change. Renewable energy design, better insulation and more efficient appliances could reduce energy demands by 60 to 80 percent. By embracing conservation and renewable energy, we can win our energy independence and help save the planet. Dave Bonta, president and founder of USA Solar Stores, the largest alternative energy retailer in the Northeast, has written about alternative energy and sustainable living for *Green Living*, *Back Home Magazine*, *Alternative Energy Retailer* and *The Vermont Guardian*. Bonta has studied renewable energy and energy efficiency for more than twenty years, is a frequent speaker at major green energy conferences across America and is a tireless advocate for green living. Also president of BioQuantum, Inc., a bio-fuels company, Bonta is the creator of *BackHome* chapters in America and is president of a renewable energy community organization, The Sustainable Valley Group. Stephen Snyder, communications director for USA Solar Stores, left New York City in 1995 to start an organic herb farm in Vermont with his wife, Melissa. He holds a degree in radio, television and motion picture communications from the University of North Carolina at Chapel Hill and has broad experience in communications, public affairs, and media relations. He also works as a freelance writer and has published *The Brewmaster's Bible* (HarperCollins), *The Beer Companion* (Simon & Schuster) and *The Brewmaster's Recipe Manual*.

With America on the brink of the largest number of older adults and persons with disabilities in the country’s history, the deceleration in housing production during the first decade of the twenty-first century, and a continued reliance on conventional housing policies and practices, a perfect storm has emerged in the housing industry. The lack of fit between the existing housing stock and the needs of the U.S. population is growing pronounced. Just as housing needed to be retooled at the end of WWII, the American housing industry is in dire need of change today. The South—with its high rates of poverty, older residents, residents with disabilities, extensive rural areas, and out-of-date housing policies and

practices—serves as a “canary in the coal mine” for the impending, nationwide housing crisis. *Just Below the Line* discusses how reworking the policies and practices of the housing industry in the South can serve as a model for the rest of the nation in meeting the physical and social needs of persons with disabilities and aging boomers. Policy makers, designers, builders, realtors, advocates, and housing consumers will be able to use this book to promote the production of equitable housing nationwide. Published in collaboration with the Fay Jones School of Architecture.

Innovation contributes to corporate competitiveness, economic performance and environmental sustainability. In the Internet era, innovation intelligence is transferred across borders and languages at an unprecedented rate, yet the ability to benefit from it seems to become more divergent among different corporations and countries. How much an organization can benefit from innovation largely depends on how well innovation is managed in it. Thus, there is a discernible increase in interest in the study of innovation management. This handbook provides a comprehensive guide to this subject. The handbook introduces the basic framework of innovation and innovation management. It also presents innovation management from the perspectives of strategy, organization and resource, as well as institution and culture. The book’s comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.

The quick and easy way to manage money and achieve financial goals The recent economic meltdown has left people in terrible financial shape with little idea of how to turn things around. Using Morningstar's time-tested strategies and sensible approach to money management, *Morningstar's 30-Minute Money Solutions: A Step-by-Step Guide to Managing Your Finances* breaks down important financial tasks into do-able chunks, each of which can be accomplished in 30 minutes or less. This compendium on healthy living from the trusted Mayo Clinic organization combines two home health books into one must-have resource. Anyone looking to improve health in a safe, smart, innovative, and minimally-invasive way will want this guide. The book teaches what integrative medicine is—the medical movement to incorporate treatments that were once thought questionable but now are scientifically proven to work into everyday therapies, combining those alternative methods with traditional medicine to produce best results. The book offers a revolutionary approach to healing by highlighting ways that integrative medicine addresses not only the physical body but also the mind and spirit. With this trifold view of wellness in mind, the book covers topics like meditation, homeopathy, acupuncture, reflexology, herbs and supplements, and more, giving readers new solutions to their health issues.

Log Home Design is the preferred, trusted partner with readers in simplifying the process of becoming a log home owner. With its exclusive focus on planning and design, the magazine's friendly tone, practical content and targeted advertising provide the essential tools consumers need – from the crucial preliminary stages through the finishing touches of their dream log home.

Providing a coherent and multidisciplinary approach to digitalization, this *Modern Guide* aims to systematize how the digitalization process affects infrastructure-based industries, including telecommunications, transport, energy, water and postal services.
