Featuring case studies from varied settings with strong grounding in real-world decisions, this text illustrates basic concepts while expanding students' understanding of economic, political and cultural concerns that must be interwoven into such key areas as process design, quality and supply chain management.

(Black & White version) Fundamentals of Business was created for Virginia Tech's MGT 1104 Foundations of Business through a collaboration between the Pamplin College of Business and Virginia Tech Libraries. This book is freely available at: <http://hdl.handle.net/10919/70961> It is licensed with a Creative Commons-NonCommercial ShareAlike 3.0 license.

The book covers the standard models and techniques used in decision making in organizations. The main emphasis of the book is on modeling business-related scenarios and the generation of decision alternatives. Fully solved examples from many areas are used to illustrate the main concepts without getting bogged down in technical details. The book presents an approach to operations research that is heavily based on modeling and makes extensive use of sensitivity analyses. It is a result of many years of combined teaching experience of the authors. The second edition adds new material on multi-criteria optimization, postman problems, Lagrangian relaxation, cutting planes, machine scheduling, and Markov chains. Support material is found on a free website and includes some algorithms, additional fully solved problems and slides for instructors.

As the services sector has become the most important sector of many of our economies, this book makes a valued contribution to our greater understanding of what features are critical to operational success in this sector. Based upon sound research and drawing on numerous cases studies, the author has delivered an expose that will be of value to academics and practitioners alike. From a long career in the field, the author has distilled critical content into a well-organised book that is a must for students and practitioners in services operations management. It is welcoming to read of service operations management in the not-for-profit and public sectors. | Peter Liesch, University of Queensland Business School, Brisbane, Australia | David has captured the essentials of service operations within a complete enterprise framework. Based upon case studies from a broad variety of organizations from around the globe, this easy to understand text is a must for students and practitioners alike. Students of service operations and indeed services marketing have been long awaiting a reference such as this. | Derek Lundberg, Metcash Food & Grocery | The author recognizes the critical fact that service operations is worlds apart from manufacturing operations management that produces tangible products - a falling of so many other texts that have drawn on yesteryear manufacturing paradigms to try and explain services. This book succeeds in combining operational analysis with the empirical research to arrive at a comprehensive understanding of the forces that shape and change the service sectors. Drawing on a wealth of information by virtue of his track record of many years researching the service sectors, this book will be invaluable to both students, practitioners and anyone interested in successful service operations - tourism, hospitality, transport, retailing, utilities, not for profit, public service. | George Downie, Senior Lecturer, Southampton Business School, UK | This is an important book for educators, students and professional managers. As the services sector becomes a larger and increasingly pervasive part of our economy and as service operations management becomes the biggest part of most organizations, the opportunity to increase productivity, quality, flexibility and innovation of service provision must be grasped firmly by those who want their organizations to remain competitive and successful. This book very effectively blends conceptual frameworks with new, practical case studies. It is full of valuable and useful insights. | Danny Samson, University of Melbourne, Australia This comprehensive textbook will become required reading for postgraduate students seeking to understand the principles of service operations management and for undergraduate students specializing in hospitality, tourism or the public sector. It will also serve as a handbook for operations managers in service organizations as they seek to develop and implement improved operations strategies. Focusing on service delivery design, capacity, recovery, performance measurement and service strategy, the challenge of delivering exceptional service quality is addressed through a comparison of customers' perceptions and expectations. A new approach to quality in services describes the tools and methods for continuous service improvement. This accessible and engaging textbook is the ideal foundation for a course in service operations management. Each chapter: - ' represents a lecture and specific topic - with specified learning objectives and outcomes ' develops using a 'chunking and scaffold' pedagogical technique - sub-sections in the chapter develop the chapter's theme ' includes examples of organizations and small case-vignettes suitable for class/group discussion and larger cases of international organizations for set-work activity ' draws upon contemporary research with clear citations to show the source - each chapter has a bibliography and reference list ' includes a series of questions that can be asked of the audience/students - either to promote discussion or to be set as an assignment See the companion website - INCLUDE LINK - for an Instructor Resource Guide and PowerPoint slides, with tips for activities and as a general guide to explore issues raised in the book.

Describes the key concepts of operations management, covering such topics as planning and control, the role of technology, and "just-in-time" techniques.
