Suitable for most media including pencils, pens, acrylics and light felt tipped pens. Order your Blank Drawing Book journal today. It makes the perfect gift for kids and students.

This volume of original stories is all for furry feline friends. A unique collection of fantastical cat tales.

This study analyses the various types and stages of conflict that have been experienced by diverse groups and generations of Karen over the six decades of armed conflict between the Karen National Union (KNU) and successive Burmese governments. Instead of focusing on those who are internally displaced, those in the refugee camps on the Thai-Burma border or living abroad, or those in the KNU, it places particular emphasis on the "other" Karen, or the majority segment of the Karen population living inside Burma, a population that has hitherto received little scholarly and journalistic attention. It also assesses the Karen people's varied attitudes toward a number of political organizations that claim to represent their interests, toward successive Burmese military regimes, and toward the political issues that led to the original divide between "accommodators" and "rebels." This study argues that the lifestyles and strategies that the Karens have pursued are diverse and not confined to armed resistance. Acknowledging these multiple voices will not only shed light upon the many positive features of ethnic interactions, including harmonious communal relationships and significant attempts to promote peace and stability by encouraging "normal" activities and routines in both peaceful and war-torn areas; it will also help to identify policy recommendations for future ceasefire negotiations and a possible long-term political settlement within the context of a militarized Burma.

What makes you passionate about working with SQL Server? What lessons have you learned, perhaps the hard way, on how to get the best performance and scalability out of your SQL Server databases? We challenged a group of talented, up-and-coming "new voices" in SQL Server to share their passion and knowledge with the Community. A DBA's core responsibilities are constant. A DBA must maintain and enforce security mechanisms on the data, prepare effectively for disaster recovery, ensure the performance and availability of all the databases in their care. As such, we have chapters providing tips on how to get the most out of features such as data compression, backup verification, performance tuning with traces and extended events, auditing, SSIS, and more. Side by side with these, we have chapters on the importance to a DBA of communicating clearly with their co-workers and business leaders, presenting data as useful information that the business can use to make decisions, adopting a more Agile approach to their work, and sound project management skills. The resulting book, Tribal SQL, is a reflection of how a DBA's core and long-standing responsibilities sit alongside new thinking and fresh ideas about where the DBA role is going, and what it means to be a DBA in today's businesses.

The hope-filled sequel to the bestselling One Tuesday Morning. In this new novel by Karen Kingsbury, three years have passed since the terrorist attacks on New York City. Jamie Bryan, widow of a firefighter who lost his life on that terrible day, has found meaning in her season of loss by volunteering at St. Paul's, the memorial chapel across the street from where the Twin Towers once stood. Here she meets a daily stream of people touched by the tragedy, including two men with whom she feels a connection. One is a firefighter also changed by the attacks, the other a police officer from Los Angeles. But as Jamie gets to know the police officer, she is stunned to find out that he is the brother of Eric Michaels, the man with the uncanny resemblance to Jamie's husband, the man who lived with her for three months after September 11. Eric is the man she has vowed never to see again. Certain she could not share even a friendship with his brother, Jamie shuts out the police officer and delves deeper into her work at St. Paul's. Now it will take the persistence of a tenacious man, the questions from her curious young daughter, and the words from her dead husband's journal to move Jamie beyond one Tuesday morning. Jamie Bryan took her position at the far end of the Staten Island Ferry, pressed her body against the railing, eyes on the place where the Twin Towers once stood. She could face it now, every day if she had to. The terrorist attacks had happened, the World Trade Center had collapsed, and the only man she'd ever loved had gone down with them. Late fall was warmer than usual, and the breeze across the water washed over Jamie's face. If she could do this, if she could make this journey three times a week while Sierra was in school, then she could convince herself to get through another long, dark night. She could face the empty place in the bed beside her, face the longing for the man who had been her best friend, the one she'd fallen for when she was only a girl.!

In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

From the New York Times bestselling author of The Cupcake Bakery Mysteries comes the start of a series about a library where the mysteries refuse to stay in the fiction section... Lindsey is getting into her groove as the director of the Briar Creek Public Library when a New York editor visits town, creating quite a buzz. Lindsey's friend Beth wants to sell the editor her children's book, but Beth's boyfriend, a famous author, gets in the way. When they go to confront him, he's found murdered and Beth is the prime suspect. Lindsey has to act fast before they throw the book at the wrong person.

Winner of the 2012 Philip K. Dick Award Theorem: Petrovitch has a lot of secrets. Proof: Secrets like how to make anti-gravity for one. For another, he's keeping a sentient computer program on a secret server farm - the same program that nearly destroyed the Metrozone a few months back. Theorem: The city is broken. Proof: The people of the OutZone want what citizens of the Metrozone have. And then burn it to the ground. Now, with the heart of the city destroyed by the New Machine Jihad, the Outes finally see their chance. Theorem: These events are not unconnected. Proof: Someone is trying to kill Petrovitch and they're willing to sink the whole city to do it.
