If you do not yet scuba dive but are thinking of learning, then Scuba Fundamental - Start Diving the Right Way is for you. It takes you from the germ of the idea that you might like to try scuba diving up to the point where you have done around 20 dives. This is not your standard how-to scuba diving manual. It is very different. The purpose of Scuba Fundamental is not to teach you how to dive. A dive instructor will do that. But this book will make the learning process much easier. It will help you make the right choices and avoid the pitfalls that await new and uninformed divers coming into the sport. It will also set you well on the road to becoming a capable and competent lifelong diver. Scuba Fundamental tells you how to make sure you are prepared for a scuba diving course and what a good beginners course should entail. It tells you how to choose a good instructor, how to decide which operators to dive with after you have finished your course and what sort of dives you should be doing when you first start diving. You will learn the many ways in which diving will change your life and also acquire some extremely valuable advice on the etiquette involved in the sport. Throughout the book and especially in the chapter "It Happened to Me" you will be entertained, educated and encouraged by anecdotes from people who are now experienced divers but were once beginners too. There is also an entire section devoted to diving safety, much of which covers vitally important aspects of scuba diving that standard training manuals don't emphasise enough or even leave out completely. The book's message is: start scuba diving the right way and you will be relaxed and ready for the adventure. You will have more fun, make fewer mistakes and be confident in the fact that you are well informed, have made the best choices and have spent your money wisely. Scuba Fundamental is a unique, reliable and essential guide: one that you can trust completely and follow during this formative phase of your scuba diving life. "I wish I had had this book to read when I learned to dive. I remember being totally confused." Robin Yao, Executive Editor, EZDIVE magazine "This is the book divers should give to friends when they say they want to learn to scuba dive." Ian Thomas, Scuba Instructor Trainer

Scuba junkies get ready! I have been diving for awhile now and never actually enjoyed the process of recording my dives afterwards. I felt like I needed a dictionary to interpret what on earth was going on with those data pages and it was honestly embarrassing to have to ask! So, I redesigned them to be both organized, visually pleasing AND still have space for all the important data! I want people to enjoy writing about their dive experiences, not cringe looking at the page. Designed by a diver for divers, I hope you have as much fun with this log book as I do:)-Record up to 50 dives on beautifully designed, easy to follow log pages - for the beginner or master diver-60 pages total: room for up to 8 certifications, notes & stamps-Easily fits into binder if you wish to hole punch it, and is the perfect travel size

The beautiful locales, exotic plant and sea life, and relaxing environs of dive locations are even more peaceful when you are armed with the expertise and skill to stay safe in any situation. With self-rescues, buddy rescues, open-water resuscitation, and towing techniques, Scuba Diving Safety will become your most valuable diving companion. Covering a full range of underwater environments, as well as dangerous marine life, entanglements, and equipment
