Presents a series of techniques for acquiring a foreign language, including news ways of training the tongue for pronunciation, use of visual imagery for connecting sounds and spelling, and spaced-repetition methods for learning new vocabulary.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, *Fluent In 3 Months*. Lewis is a full-time "language hacker," someone who devotes all of his time to finding better, faster, and more efficient ways to learn languages. *Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World* is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

This book will give you the skills to learn to speak any language with confidence. It uses techniques that can easily be incorporated into your daily life, while making use of whatever resources you have available. Whether you are starting out with your first foreign language or wishing to add to your repertoire, you'll find a wealth of easy-to-follow advice and achievable goals. Discover how to: -Speak with greater confidence and accuracy -Effectively learn vocabulary and grammar -Use time on the internet and social media to learn a language -Read real books, websites and articles in a foreign language -Pass exams that certify your language skills

Explains how to learn foreign languages, offering practical advice for overcoming the obstacles.

How adult learners can draw upon skills and knowledge honed over a lifetime to master a foreign language. Adults who want to learn a foreign language are often discouraged because they believe they cannot acquire a language as easily as children. Once they begin to learn a language, adults may be further discouraged when they find the methods used to teach children don't seem to work for them. What is an adult language learner to do? In this book, Richard Roberts and Roger Kreuz draw on insights from psychology and cognitive science to show that adults can master a foreign language if they bring to bear the skills and knowledge they have honed over a lifetime. Adults shouldn't try to learn as children do; they should learn like adults. Roberts and Kreuz report evidence that adults can learn new languages even more easily than children. Children appear to have only two advantages over adults in learning a language: they acquire a native accent more easily, and they do not suffer from self-defeating anxiety about learning a language. Adults, on the other hand, have the greater advantages—gained from experience—of an understanding of their own mental processes and knowing how to use language to do things. Adults have an especially advantageous grasp of pragmatics, the social use of language, and Roberts and Kreuz show how to leverage this metalinguistic ability in learning a new language. Learning a language takes effort. But if adult learners apply the tools acquired over a lifetime, it can be enjoyable and rewarding.

A “fascinating” (The Economist) dive into the world of linguistics that is “part travelogue, part science lesson, part intellectual investigation...an entertaining, informative survey of some of the most fascinating polyglots of our time” (The New York Times Book Review). In *Babel No More*, Michael Erard, “a monolingual with benefits,” sets out on a quest to meet language superlearners and make sense of their mental powers. On the way he uncovers the secrets of historical figures like the nineteenth-century Italian cardinal Joseph Mezzofanti, who was said to speak seventy-two languages, as well as those of living language-superlearners such as Alexander Arguelles, a modern-day polyglot who knows dozens of languages and shows Erard the tricks of the trade to give him a dark glimpse into the life of obsessive language acquisition. With his ambitious examination of what language is, where it lives in the brain, and the cultural implications of polyglots' pursuits, Erard explores the upper limits of our ability to learn and use languages and illuminates the intellectual potential in everyone. How do some people escape the curse of Babel—and what might the gods have demanded of them in return?
