On history of communication

This book makes Moore's wisdom available to students in a lively, richly illustrated account of the history and workings of life. Employing rhetoric strategies including case histories, hypotheses and deductions, and chronological narrative, it provides both a cultural history of biology and an introduction to the procedures and values of science.

For the 20 million women who suffer from painful intercourse: the first book to address the multiple causes and the available treatments. Painful sex is a condition that causes embarrassment and silence -- often going undiscussed or misdiagnosed; as many as 40 percent of women who suffer from it won't seek medical care. And most medical professionals are still in the dark when it comes to women's sexual pain. Now, three leading experts tackle the stereotypes, myths, and realities of sexual pain in this easy-to-understand, accessible guide that will help you get the help you need and deserve. Drs. Goldstein, Pukall, and Goldstein offer answers to your most pressing questions, as well as: Up-to-date information on the more than 20 causes of sexual pain How to choose the right doctor -- and how to interpret your doctor's lingo Valuable tips for understanding sexual pain, and what can be done about it How to rebuild sexual intimacy once the pain is gone Featuring groundbreaking research and stories from women who've also suffered -- and recovered -- When Sex Hurts provides all of the tools you need to stop hurting and start healing.

The years 2006 and 2007 mark a dramatic change of peoples view regarding c- mate change and energy consumption. The new IPCC report makes clear that - mankind plays a dominant role on climate change due to CO emissions from en- 2 ergy consumption, and that a significant reduction in CO emissions is necessary 2 within decades. At the same time, the supply of fossil energy sources like coal, oil, and natural gas becomes less reliable. In spring 2008, the oil price rose beyond 100 \$/barrel for the first time in history. It is commonly accepted today that we have to reduce the use of fossil fuels to cut down the dependency on the supply countries and to reduce CO emissions. The use of renewable energy sources and 2 increased energy efficiency are the main strategies to achieve this goal. In both strategies, heat and cold storage will play an important role. People use energy in different forms, as heat, as mechanical energy, and as light. With the discovery of fire, humankind was the first time able to supply heat and light when needed. About 2000 years ago, the Romans started to use ceramic tiles to store heat in under floor heating systems. Even when the fire was out, the room stayed warm. Since ancient times, people also know how to cool food with ice as cold storage.

A collection of articles by scientists, clinicians, and educators discussing clinical and empirical findings and new perspectives on death.
