The year's program consists of 25 weekly perceptual-motor lessons designed for students in preschool, kindergarten, first to third grade and special education classes.

This book is an intensive beginning program of perceptual-motor activities for ALL your preschool to first grade students AND your special education classes. Like the Level-2 book, it is fully illustrated, covers a 25 week period, contains program background setup information, evaluation scale, performance objectives, equipment construction diagrams (or equipment sources, if you don't want to make your own), plus activities kids can do at home, and special Perception Games the teacher can use to go along with the programed activities, and especially helpful sample letters to parents and organizational forms and information in setting up your own Perceptual-Motor Program. Each week is made up of three activity stations and is sequenced according to difficulty. Activity pages can be easily cut out, laminated, and used as individual activity cards!

This is the 2nd in a series of 5 activity books covering preschool and the primary grades. Use these classroom-tested movement education activities to assess your students motor strengths and weaknesses in preschool and early elementary grades or special education classes. The sequence of easily given tests and tasks requires minimal instruction time and your kids will find the activities to be interesting, challenging, and fun!

\*Developing Ocular Motor and Visual Perceptual Skills contains daily lesson plans and practical tips on how to successfully start an activities program. Other helpful features include a glossary of terms and a reference list of individuals and organizations that work with learning disabled children to develop these skills. The first of its kind, Developing Ocular Motor and Visual Perceptual Skills utilizes a learning approach by linking the theories with the remediation activities to help learning disabled children improve their perceptual and fine motor skills. All professionals looking to assess and enhance a variety of fine motor and visual perception deficiencies will welcome this workbook into their practices" -- Publisher description.

Perceptual-Motor Activities for Children: An Evidence-Based Guide to Building Physical and Cognitive Skillscontains 200 station activities that you can use to develop perceptual-motor skills in kids from preschool through elementary grades. The activities can be used in a 32-week sequential program or individually. You also receive a web resource that offers activity cards, bonus activities, active learning cards, audio tracks, a record sheet, and other tools.

A practical approach to organizing the physical education program in the elementary grades.

An innovative guide to procedures, resources, and tools for closing the gap between the learning supports students need and what they are receiving now.
