"That relatively few criminal cases in this country are resolved by full Perry Mason-style trials is fairly common knowledge. Most cases are settled by a guilty plea after some form of negotiation over the charge or sentence. But why? The standard explanation is case pressure: the enormous volume of criminal cases, to be processed with limited staff, time and resources. . . . But a large body of new empirical research now demands that we re-examine plea

negotiation. Milton Heumann's book, *Plea Bargaining*, strongly and explicitly attacks the case-pressure argument and suggests an alternative explanation for plea bargaining based on the adaptation of attorneys and judges to the local criminal court. The book is a significant and welcome addition to the literature. Heumann's investigation of case pressure and plea negotiation demonstrates solid research and careful analysis."—Michigan Law Review

This work is written primarily for law students who are learning negotiating skills in clinical courses, but it will serve equally well for lawyers and others who are interested in the topic of negotiation. The book has three main areas of emphasis. First, negotiating behavior of practicing lawyers fall into two main patterns—'cooperative' and 'aggressive'—and implications of those patterns is discussed. The author then covers the four stages of the negotiation process, and lastly lays out the legal rules and economic principles that apply to the negotiated settlement of disputes. The Appendices include transcripts to two lawyer-to-lawyer negotiations.

Blending insights from linguistic and social theories of speech, ritual and narrative with music-analytic and historical criticism, Britten's *Musical Language* offers interesting perspectives on the composer's fusion of verbal and musical utterance in opera and song. It provides close interpretative studies of the major scores (including *Peter Grimes*, *Billy Budd*, *The Turn of the Screw*, *War Requiem*, *Curlew River* and *Death in Venice*) and explores Britten's ability to fashion complex and mysterious symbolic dramas from the interplay of texted song and a wordless discourse of motives and themes. Focusing on the performative and social basis of language, Philip Rupprecht replaces traditional notions of textual 'expression' in opera with the interpretation of topics such as the role of naming and hate speech in *Peter Grimes*; the disturbance of ritual certainty in the *War Requiem*; and the codes by which childish 'innocence' is enacted in *The Turn of the Screw*.

If I have been charitable in my judgments of my fellow man; if I have tried to help him as best I could; if I have done my utmost to truly understand him, I know why I have taken this course - I could not help it. I could have had no comfort or peace of mind if I had acted any other way. I have been interested in the study of man, and the motives that move and control his life. I have rejoiced with him, and have grieved with him, I have followed my instincts and sought to rescue the suffering when I could. - Clarence Seward Darrow. The Buddhists have a term they use to describe the process of comfortably meshing our core values with the way we make our living. They refer to it as the process of finding a right livelihood. The values that Clarence Darrow meshed with his role as a lawyer came from many sources. He was a philosopher, scientist, sociologist, historian, and theologian. Darrow in no way resembled the single-dimensional linear-thinking attorney that seems to be almost cliché and epidemic in the 90s. He was not the abridged version of a lawyer. His endless effort to understand and appreciate the world outside the four walls of his law office contributed to his legendary ability as an advocate. More importantly, his effort contributed to his arriving at a right livelihood.

Let us endeavor to see things as they are, and then enquire whether we ought to complain. Whether to see life as it is, will give us much consolation, I know not; but the consolation which is drawn from truth if any there be, is solid and durable: that which may be derived from error, must be, like its original, fallacious and fugitive. Samuel Johnson, Letter to Bennet Langton (1758) Attorneys and clients make hundreds of decisions in every litigation case. From initially deciding which attorney to retain to deciding which witnesses to call at trial, from deciding whether to file a complaint to deciding whether to appeal a verdict, attorneys and clients make multiple, critical decisions about strategies, costs, arguments, valuations, evidence and negotiations. Once made, these decisions are scrutinized by an opponent intent on exploiting the consequences of any mistake. In this intense and adversarial arena, decision-making errors often are transparent, irreversible and dispositive, wielding the power to bankrupt clients and dissolve law firms. Although attorneys and clients may regard sound decision making as incidental to effective lawyering, sound decision making actually is the essence of effective lawyering. An attorney's knowledge, intelligence and experience are inert resources until the attorney decides how to deploy those skills to serve the client's interests. Those decisions, in turn, largely determine a case's course and outcome.
