A rare combination of vivid science, compassionate storytelling, and lasting spiritual lessons. A delight to read. Philip Yancey Our bodies are designed to heal. We fall off our bikes and skin our knees and without effort on our part, the skin looks like new in a few days. But while our skinned knees easily heal, it can sometimes feel like our emotional and relational wounds are left gaping open, broken beyond repair. If our bodies instinctively know how to heal physical injuries, could they also help us understand how to restore painful emotional and relational ruptures? In their groundbreaking debut book, physician Jennie McLaurin and scientist Cymbeline T. Culiati write *Designed to Heal*: a fascinating look at how the

Kingdom of God Made Simple series; a self-study course designed to train believers how to live out the fullness of the life offered to us as heirs of God's kingdom. The predominant view in the church today holds that seeing in the spirit is a rare gift given to only a few special people, or an anointing we must seek. With the same straightforward, down-to-earth style used in "Divine Healing Made Simple," the author holds this view up to the light of scripture, and suggests that it has no biblical basis. Rather than being a gift given by God to only a few people, seeing in the spirit is an innate ability we all possess, which lies undeveloped in most of us. Through prayer, training and exercise, this ability can be awakened and used by virtually anyone. The author provides Bible-based teaching along with dozens of testimonies and illustrations. There are also practical exercises at the end of the chapters to help develop your

New Self, New World challenges the primary story of what it means to be human, the random and materialistic lifestyle that author Philip Shepherd calls our "shattered reality." This reality encourages us to live in our heads, self-absorbed in our own anxieties. Drawing on diverse sources and inspiration, New Self, New World reveals that our state of head-consciousness falsely teaches us to see the body as something we possess and to try to take care of it without ever really learning how to inhabit it. Shepherd articulates his vision of a world in which each of us

enjoys a direct, unmediated experience of being alive. He petitions against the futile pursuit of the "known self" and instead reveals the simple grace of just being present. In compelling prose, Shepherd asks us to surrender to the reality of "what is" that enables us to reunite with our own being. Each chapter is accompanied by exercises meant to bring Shepherd's vision into daily life, what the author calls a practice that "facilitates the voluntary sabotage of long-standing patterns." *New Self, New World* is at once a philosophical primer, a spiritual handbook, and a roaming inquiry into human history.
