Sir Thomas Lewis has become one of the greatest cardiologists of this century. He was foremost in using the newly invented electrocardiograph to diagnose heart disease and was a pioneer of cardiac electro-physiology. This is the first biography of Sir Thomas Lewis, who became famous, whilst still quite young, for his outstanding pioneer work in electrocardiography. It recounts the scientific career of Lewis, together with accounts of his hospital work and teaching, and his family life and hobbies. There are over 100 illustrations including Lewis and his co-workers, and much of the

information about Lewis has been derived from first hand accounts by his former associates. This biography appeal to cardiologists and to those physicians, surgeons and research workers with a special interest in the skin, pain and vascular disease, as well as clinical physiologists and medical historians.

This volume highlights some of the many accomplishments of British hydrogeologists during the last 200 years. Twenty-five essays discuss such topics as the use of groundwater in 19th-century Scottish spas; the contribution of geologists to British army well-drilling units in WWI; and the development of the profession since 1974. Fifteen of the pape.

In this textbook we see heritage in action in indigenous and vernacular communities, in urban development and regeneration schemes, in expressions of community, in acts of nostalgia and memorialization and counteracts of forgetting, in museums and other spaces of representation, in tourism, in the offices of those making public policy, and in the politics of identity and claims toward cultural property. Whether renowned or local, tangible or intangible, the entire

heritage enterprise, at whatever scale, is by now inextricably embedded in “value”. The global context requires a sanguine approach to heritage in which the so-called critical stance is not just theorized in a rarefied sphere of scholarly lexical gymnastics, but practically engaged and seen to be doing things in the world.
