Best Eurovision Song Ever | The Eurovision Times

" Feel Like I `m Fixin To Die Rag" – Country Joe McDonald & The Fish (1965) – Written by a former Navy man, this satirical song became an iconic protest song of the Vietnam era.
3. " Leavin ' on a Jet Plane " – Peter, Paul, & Mary (1967) – Not written about the war directly, but it again became a song associated with departure for Vietnam.

35 Songs about the Vietnam Era | Your Stories. Your Wall.

Hope all of you like and support our WordPress Blog. Please check as below Youtube Channel regard to Khmer Popular Song:
1. Khmer Music II...

Popular music has long been used to entertain, provoke, challenge and liberate but also to oppress and control. Can popular music be political? What types of popular music work best with politics? How can songs, videos, concerts or any other musical commodity convey ideas about power, politics and identity? Using Multimodal Critical Discourse Studies (MCDS), this book reveals the deeply political role played by popular music. Lyndon Way demonstrates how MCDS can provide important and timely insights on the political nature of popular music, due to its focus on how communication takes place, as well as its interest in discourse and how ideologies are naturalised and legitimised. The book considers the example of contemporary Turkish society, with its complex and deep ideological divisions increasingly obvious under the stewardship of President Recep Tayyip Erdogan and his centre-right political party, in power since 2002. It looks at how the authorities seek to harness and control popular music and considers a wide range of popular music genres including rock, rap, protest and folk music. It shows how official promotional videos, protest cut-and-paste offerings, party-political election songs, live music events and internet discussions about popular music emerge as sites of power and resistance in certain venues and particularly across social media. Throughout the book, Lyndon Way shows that popular music is also deeply political.

As a sociologist Simon Frith takes the starting point that music is the result of the play of social forces, whether as an idea, an experience or an activity. The essays in this important collection address these forces, recognising that music is an effect of a continuous process of negotiation, dispute and agreement between the individual actors who make up a music world. The emphasis is always on discourse, on the way in which people talk and write about music, and the part this plays in the social construction of musical meaning and value. The collection includes nineteen essays, some of which have had a major impact on the field, along with an autobiographical introduction.

This volume examines the location of memories and histories of popular music and its multiple pasts, exploring the different `places ` in which popular music can be situated, including the local physical site, the museum storeroom and exhibition space, and the digitized archive and display space made possible by the internet. Contributors from a broad range of disciplines such as archive studies, popular music studies, media and cultural studies, leisure and tourism, sociology, museum studies, communication studies, cultural geography, and social anthropology visit the specialized locus of popular music histories and heritage, offering diverse set of approaches. Popular music studies has increasingly engaged with popular music histories, exploring memory processes and considering identity, collective and cultural memory, and notions of popular culture `s heritage values, yet few accounts have spatially located such trends to focus on the spaces and places where we encounter and engender our relationship with popular music `s history and legacies. This book offers a timely re-evaluation of such sites, reinserting them into the narratives of popular music and offering new perspectives on their function and significance within the production of popular music heritage. Bringing together recent research based on extensive fieldwork from scholars of popular music studies, cultural sociology, and museum studies, alongside the new insights of practice-based considerations of current practitioners within the field of popular music heritage, this is the first collection to address the interdisciplinary interest in situating popular music histories, heritages, and pasts. The book will therefore appeal to a wide and growing academic readership focused on issues of heritage, cultural memory, and popular music, and provide a timely intervention in a field of study that is engaging scholars from across a broad spectrum of disciplinary backgrounds and theoretical perspectives.

Building on a foundation of news stories, Producing Online News shows students how to use the right tools to get the right information to the right people at the right time. The goal is to become a full-fledged online news producer and transform stories into a complete news experience for an ever more demanding audience. Ryan Thornburg, a journalism trainer who has managed the websites of top news organizations, hones the skills students need to produce stories using multimedia, interactivity and on-demand delivery- online journalism's three pillars. Practical instructions show students not just how to use the tools but also how to make good journalistic choices in applying them. The book works for courses specifically in online journalism or for any journalism course that incorporates multiple platforms.

An essential part of human expression, humor plays a role in all forms of art, and humorous and comedic aspects have always been part of popular music. For the first time, The Routledge Companion to Popular Music and Humor draws together scholarship exploring how the element of humor interacts with the artistic and social aspects of the musical experience. Discussing humor in popular music across eras from Tin Pan Alley to the present, and examining the role of humor in different musical genres, case studies of artists, and media forms, this volume is a groundbreaking collection that provides a go-to reference for scholars in music, popular culture, and media studies. While most scholars, when considering humor `s place in popular music, tend to focus on more "literate" forms, the contributors in this collection seek to fill in the gaps by surveying all kinds of humor, critical theories, and popular music. Across eight parts, the essays in this collection explore topics both highbrow and low, including: Parody and satire
Humor in rock and global music
Gender, sexuality, and politics
The music mockumentary
Novelty songs
Humor has long been a fixture of the popular music soundscape, whether on stage, in performance, on record, or on film. The Routledge Companion to Popular Music and Humor covers it all, presenting itself as the most comprehensive treatment of the topic to date.

Becoming a blogger takes practice, hard work, and, ultimately, a passion for the craft. Whether you plan to blog on politics or parenting, The Elements of Blogging is designed to give you the skills and strategies to get started, to sustain your work, and to seek out a robust audience. This book is loaded with practical advice on important topics such as determining a niche, finding the best stories, and blogging effectively and ethically. It features examples from both amateur and professional bloggers that show the techniques for building an argument, finding a voice, crafting a headline, and establishing a brand. Key features:
Real-world applicability. This book includes thumbnail profiles of bloggers and their sites, which illuminate key skills you will need to become an effective blogger
Interactivity. Each chapter features discussion points and exercises intended to get you to think about, reflect on, and apply the contents of each chapter
Creativity. While this book dives into software and plug-ins for bloggers, its main goal is to cover how to write blogs on a myriad of topics: news, opinion pieces, travel, politics, art, and more. Visit the companion website: http://www.theelementsofblogging.com/

Bringing together exciting new interdisciplinary work from emerging and established scholars in the UK and beyond, Litpop addresses the question: how has writing past and present been influenced by popular music, and vice versa? Contributions explore how various forms of writing have had a crucial role to play in making popular music what it is, and how popular music informs `literary ` writing in diverse ways. The collection features musicologists, literary critics, experts in cultural studies, and creative writers, organised in three themed sections.
` Making Litpop ` explores how hybrids of writing and popular music have been created by musicians and authors.
` Thinking Litpop ` considers what critical or intellectual frameworks help us to understand these hybrid cultural forms. Finally, ` Consuming Litpop ` examines how writers deal with music `s influence, how musicians engage with literary texts, and how audiences of music and writing understand their own role in making ` Litpop ` happen. Discussing a range of genres and periods of writing and popular music, this unique collection identifies, theorizes, and problematises connections between different forms of expression, making a vital contribution to popular musicology, and literary and cultural studies.

This book explores the fundamentals of popular music performance for students in contemporary music institutions. Drawing on the insights of performance practice research, it discusses the unwritten rules of performances in popular music, what it takes to create a memorable performance, and live popular music as a creative industry. The authors offer a practical overview of topics ranging from rehearsals to stagecraft, and what to do when things go wrong. Chapters on promotion, recordings, and the music industry place performance in the context of building a career. Performing Popular Music introduces aspiring musicians to the elements of crafting compelling performances and succeeding in the world of today `s popular music.

This book explores the ways in which popular music can criticise political, social and economic structures, through the lens of alternate rock band Manic Street Preachers. Unlike most recent work on popular music, Peters concentrates largely on lyrical content to defend the provocative claim that the Welsh band pushes the critical message shaped in their lyrics to the forefront. Their music, this suggests, along with sleeve art, body-art, video-clips, clothes, interviews and performances, serves to emphasise this critical message and the primary role played by the band `s lyrics. Blending the disciplines of popular music studies, culture studies and philosophy, Peters confronts the ideas of German philosopher and social critic Theodor W. Adorno with the entire catalogue of Manic Street Preachers, from their 1988 single ` Suicide Alley ` to their 2018 album Resistance is Futile. Although Adorno argues that popular music is unable to resist the standardising machinery of consumption culture, Peters paradoxically uses his ideas to show that Manic Street Preachers releases shape ` critical models ` with which to formulate social and political critique. This notion of the ` critical model ` enables Peters to argue that the catalogue of Manic Street Preachers critically addresses a wide range of themes, from totalitarianism to Holocaust representation, postmodern temporality to Europeanism, and from Nietzsche `s ideas about self-overcoming to reflections on digimodernism and post-truth politics. The book therefore persuasively shows that Manic Street Preacher lyrics constitute an intertextual network of links between diverse cultural and political phenomena, encouraging listeners to critically reflect on the structures that shape our lives.

For female pop stars, whose star bodies and star performances are undisputedly the objects of a sexualized external gaze, the process of ageing in public poses particular challenges. Taking a broadly feminist perspective, `Rock On': women, ageing and popular music shifts popular music studies in a new direction. Focussing on British, American and Latina women performers and ageing, the collection investigates the cultural work performed by artists such as Shirley Bassey, Petula Clark, Madonna, Celia Cruz, Grace Jones and Courtney Love. The study crosses generations of performers and audiences enabling an examination of changing socio-historical contexts and an exploration of the relationships at play between performance strategies, star persona and the popular music press. For instance, the strategies employed by Madonna and Grace Jones to engage with the processes and issues related to public ageing are not the same as those employed by Courtney Love or Celia Cruz. The essays in this insightful collection reflect on the ways that artists and fans destablise both the linear trajectories and the compelling weight of expectations regarding ageing by employing different modalities of resistance through persona re-invention, nostalgia, postmodern intertextuality and even early death as the ultimate denial of age.
