This book demonstrates that monastic preaching was a diverse activity which included preaching by monks, nuns and heretics. The study offers a preliminary step in understanding how preaching shaped monastic identity in the Middle Ages.

In the thirteenth century, expansions in international commerce brought a new class of merchants and bankers to Florence who displaced the old, semifeudal aristocracy from power. Heavy migration from the countryside created a prosperous class of craftsmen, shopkeepers, and professionals who sought to share the power of the new, nonaristocratic elite. In Preaching in Medieval Florence, Daniel Lesnick reveals that the mendicant orders of St. Dominic and St. Francis assumed responsibility for ministering to the new urban laity and did so by embracing ideologies that corresponded to their audiences' secular needs.

Preacher, Sermon and Audience in the Middle Ages outlines the state of sermon studies research and points to new areas of investigation. Subjects include a consideration of audience composition, heretical preaching, rhetoric, sermon genres, and the use of art in medieval preaching.

Francis of Assisi, whose Gospel performance captured the imagination of his day, fostered a movement which was fascinated by the transformative power of the embodied Word. Franciscans and Preaching offers the first extensive English language study of medieval Franciscan preaching.

A wide-ranging and varied collection of essays which examine surviving garments, methods of production and clothes in society.

"When the city was filled with these bonfires, he then combed the city, and whenever he received notice of some public sodomite, he had him immediately seized and thrown into the nearest bonfire at hand and had him burned immediately." This story, of an anonymous individual who sought to cleanse medieval Paris, was part of a sermon delivered in Siena, Italy, in 1427. The speaker, the friar Bernardino (1380-1444), was one of the most important public figures of the time, and he spent forty years combing the towns of Italy, instructing, admonishing, and entertaining the crowds that gathered in prodigious numbers to hear his sermons. His story of the Parisian vigilante was a recommendation. Sexual deviants were the objects of relentless, unconditional persecution in Bernardino's sermons. Other targets of the preacher's venom were witches, Jews, and heretics. Mormando takes us into the social underworld of early Renaissance Italy to discover how one enormously influential figure helped to dramatically increase fear, hatred, and intolerance for those on society's margins. This book is the first on Bernardino to appear in thirty-five years, and the first ever to consider the preacher's inflammatory role in Renaissance social issues.

Wide-ranging history of the Franciscan Order in the Middle Ages, examining its growth and impact on society.
