Awarded AJN Book of the Year Award 2012! From performing CPR on an adult, child, or infant to dealing with bleeding and shock, cuts and broken bones, heart attacks, emergency childbirth, poisoning, drowning, scuba diving mishaps, wilderness survival, and natural disasters such as tornadoes, wildfires, floods, and earthquakes...this portable, waterproof guide helps you quickly find the information you need to develop a plan of action for assessing and treating all kinds of first aid and survival emergencies.

For the last four years, the author researched WFA textbooks from the major wilderness medical schools and reduced thousands of pages of text into intuitive, easy-to-use flow diagrams that improve understanding and increases knowledge retention. Unlike textbooks that explain Wilderness First Aid using just words, Wilderness First Aid Made Easy graphically illustrates the entire patient treatment and care process. The 2021 Edition goes one most step further by enabling the reader to view over 50 presentations and demonstrations from the School of First Aid's Wilderness First Aid course. To view the

presentations, ensure your smart device has its QR Code Reader App enabled and point your smart device's camera at the QR Code found on pages throughout the book. You will be directed to video demonstrations, classroom lectures and downloadable handouts. Each algorithm is explained, step-by-step in using concise, to the point video presentations. Video demonstrations throughout the book will further your knowledge by viewing the application of WFA concepts.

The Wilderness First Aid Handbook is a handy, quick-reference guide easily accessible with basic wilderness first aid knowledge, but it does not require advanced degrees or experience with medicine and prehospital care. Recognizing that certain knowledge and procedures are outside the scope of a layperson's training, Dr. Grant Lipman limits the use of technical terms and advanced techniques that may be unfamiliar to some readers or beyond their comfort zone. This system-based, easy-to-follow guide assists the first aid provider when encountering most wilderness emergencies, from cold and heat concerns and blister treatments to high altitude illness and lightning injury prevention—and much more. Typically the most challenging decision in the wilderness environment is when to evacuate a sick or potentially sick person, and as such, each section has detailed decision-making steps to inform you of when to be concerned and when to get out. This guidance is based upon the recent evidence-based consensus statement published by the Wilderness Medical Society on the scope of practice of wilderness first aid. Filled with original, full-color artwork illustrating the techniques and procedures described and with internal-spiral binding and waterproof pages handy for travel into extreme environments, The Wilderness First Aid Handbook is a must-have for every back pocket or backpack.

Graphic step-by-step presentations guide farmers through daily health checks, basic dental and hoof care, preventive procedures, emergency first aid care, and wound treatment.

Based on the 2015 International Consensus Guidelines for Cardiopulmonary Resuscitation (CPR) and Emergency Cardiac Care (ECC), Standard First Aid, CPR, and AED, Seventh Edition is ideal for use within training courses designed to certify individuals in first aid, CPR, and AED. More than a stand-alone text, this student manual is the center of an integrated teaching and learning system that offers many resources to better support instructors and prepare students.
