Perfect gift for that special daughter in your life. Blank Lined Journal Large 8.5 x 11 Soft Matte Cover for luxurious feel Great Birthday Gift, Christmas Basket Fillers and Children's Party Favors

A cool guide to help kids develop robots and electronics About This Book Get clearly-written code with descriptions and comments that explain each code section The book comes with separate code files, one entire program at a time, as well as many diagrams and separate downloadable files that contain colored photos explaining steps in the book Kids can build multiple projects during the course of the book; by the end, they will have working projects of their own Who This Book Is For This book is for children aged 9 and up, and their parents, who may or may not have a technical background. This book is tailored around the central idea of introducing electronics as a fun and a curiosity-inducing exercise. This book can act as a bonding exercise between parent and child over a single weekend. What You Will Learn Write simple programs using variables, functions, loops, arrays, and libraries Set up the Arduino and understand its internal functioning Get to grips with connections in electronics and arrive at ways to connect various components yourself Delve into various sensors and their selection and build your own sensor Unravel the concept of resistors and capacitors along with understanding the physics of electronics Become an inventor through interactive exercises (such as making a friend happy with a proximity sensor, and giving "life" to a plant) In detail The mission of this book is to integrate technology with the tools that children already use for crafts so that they feel that the technology is an extension of their playtime. We use coding, sensors, and micro-controllers integrated with art and craft supplies, origami, and Playdough. There are 10 fun-filled chapters that talk to children directly, and give clear instructions for non-technical parents too. We use Arduino as the controller of choice due to its easy availability and large community. By the end of the book, children will comfortably be able to set up their Arduino, read and understand code, manipulate code, and ultimately write their own code for projects. They will also be able to use basic sensors and know how components connect to each other. All the learning takes place with lots of colorful pictures and the circuits are neatly presented using wiring. Style and approach This book will show you the glamour of common and easily available sensors, so that kids and parents waste no time searching for parts. We provide simple yet fun projects with step-by-step instructions that make it easy to get hands-on.

The fight for equality continues, from 1960 to now. Combining portraits of past and present social justice activists with documentary images from recent protests throughout the United States, #1960Now sheds light on the parallels between the 1960s Civil Rights Movement and the Black Lives Matter movement of today. Shelia Free Bright's striking black-and-white photographs capture the courage and conviction of '60s elder statesmen and a new generation of activists, offering a powerful reminder that the fight for justice is far from over. #1960Now represents an important new contribution to American protest photography.

From the creation of the QWERTY keyboard to the world's first portable typing machine, this handsome collection is a visual homage to the golden age of the typewriter. From the first typewriter—the Sholes & Glidden Type Writer of 1874—to the iconic electric models of the 1960s, eighty vintage devices are profiled in elegant photographs and fascinating text that highlights the design modifications, intricate details, and peculiar quirks that make each typewriter unique. From functional advances like noiseless machines to luxurious details such as mahogany covers and inlaid mother-of-pearl, a century of design innovation and experimentation is charted in these pages. Packed with visuals and rich with history, Typewriters is the essential story of a writing invention that changed the world.

This exciting new anthology includes a new novella featuring Mercedes Lackey's most popular heroines, Tarma (one of the sword-sworn and most feared of all warriors) and Kethry (who wields magic and weapons for the greater good), whose fates are suddenly bound together in blood by the powers that control their destinies. Also included in the unique volume is the complete collection of Lackey's short stories about these two brave sisters as they answer the call of their destinies with sword and sorcery!
