This anthology of international scholarship offers new critical approaches to the study of the many manifestations of the paranormal in the Middle Ages. The guiding principle of the collection is to depart from symbolic or reductionist readings of the subject matter in favor of focusing on the paranormal as human experience and, essentially, on how these experiences are defined by the sources. The authors work with a variety of medieval Icelandic textual sources, including family sagas, legendary sagas, romances, poetry, hagiography and miracles, exploring the diversity of paranormal activity in the medieval North. This volume questions all previous definitions of the subject matter, most decisively the idea of saga realism, and opens up new avenues in saga research.

This book presents evidence in support of the hypothesis that Ship English of the early Atlantic colonial period was a distinct variety with characteristic features. It is motivated by the recognition that late-seventeenth and early-eighteenth century sailors' speech was potentially an influential variety in nascent creoles and English varieties of the Caribbean, yet few academic studies have attempted to define the characteristics of this speech. Therefore, the two principal aims of this study were, firstly, to outline the socio-demographics of the maritime communities and examine how variant linguistic features may have developed and spread among these communities, and, secondly, to generate baseline data on the characteristic features of Ship English. The methodology's data collection strategy targeted written representations of sailors' speech prepared or published between the dates 1620 and 1750, and prioritized documents that were composed by working mariners. These written representations were then analyzed following a mixed methods triangulation design that converged the qualitative and quantitative data to determine plausible interpretations of the most likely spoken forms. Findings substantiate claims that there was a distinct dialect of English that was spoken by sailors during the period of early English colonial expansion. They also suggest that Ship English was a sociolect formed through the mixing, leveling and simplification processes of koineization. Indicators suggest that this occupation-specific variety stabilized and spread in maritime communities through predominantly oral speech practices and strong affiliations among groups of sailors. It was also transferred to port communities and sailors' home regions through regular contact between sailors speaking this sociolect and the land-based service-providers and communities that maintained and supplied the fleets. Linguistic data show that morphological characteristics of Ship English are evident at the word-level, and syntactic characteristics are evident not only in phrase construction but also at the larger clause and sentence levels, whilst discourse is marked by characteristic patterns of subordination and culture-specific interjection patterns. The newly-identified characteristics of Ship English detailed here provide baseline data that may now serve as an entry point for scholars to integrate this language variety into the discourse on dialect variation in Early Modern English period and the theories on pidgin and creole genesis as a result of language contact in the early colonial period.

Tracing material and metaphorical waste through the Western canon, ranging from Beowulf to Samuel Beckett, Susan Sigme Morrison disrupts traditional perceptions of waste to better understand how we theorize, manage, and are implicated in what is discarded and seen as garbage. Engaging a wide range of disciplines, Morrison addresses how the materiality of waste has been sedimented into a variety of toxic metaphors. If scholars can read waste as possessing dynamic agency, how might that change the ethics of refuse-ing and ostracizing wasted humans? A major contribution to the growing field of Waste Studies, this comparative and theoretically innovative book confronts the reader with the ethical urgency present in waste literature itself.

Men knows what love looks like. Since her mom died over a year ago, she's seen it every day on her orphaned younger brother's face. Men knows what love feels like, too. Because when she touches people, she feels what they do. "Uniquely perceptive" is what her mom called it, and Men's not going to argue; she doesn't know any different. But an energy therapy study changes not only what Men knows about her unusual gift; it also changes her. Now, instead of feeling emotions, her touch brings death to others. No one is safe around her, especially Ezra. Men turns to energy healers for help. And that's where she meets him: Mr. Tenacious and Audacious, Gabe Dumas. He knows about love, too; he speaks it in ways Men has never experienced. And he's never even touched her. With her heart unravelling, Men discovers a world only she can see. It may offer hope for her condition... or it may be better left hidden. -- Page [4] of cover

In grade school, she always had her nose in a book. In junior high, the other kids thought she was weird, because she actually liked reading those dusty old novels in literature class. All through high school, Goldilocks dreamed of writing a book of her own someday. But when she went to college, her parents persuaded her to study something practical. Goldilocks hated practical, and secretly she kept reading novels. But she was a very obedient girl, so she did what her parents told her. She got a very practical degree in marketing. After college, she got a job that bored her to tears--but at least it was practical. Then she got married, and within a few years, she had two children, a girl and then a boy. She quit her job to devote full time to them. As the children grew, Goldilocks took great joy in introducing them to the stories she had loved as a child. When her son went off to kindergarten, Goldilocks thought about looking for a job. But her resume now had a seven-year hole in it, and her practical skills were long out of date. The only jobs Goldilocks could qualify for were minimum wage. She suddenly realized that being practical had made her horribly unhappy. On a whim, Goldilocks decided to do the one thing she had always wanted more than anything else--she was finally going to write a novel. She didn't care if it was impractical. She didn't care if nobody would ever read her novel. She was going to do it just because she wanted to. For the first time in years, she was going to do something just for herself. And nobody was going to stop her.
