This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

At a cost of \$500 billion to American taxpayers, the savings and loan debacle of the 1980s was the worst financial crisis of the twentieth century as well as a crime unparalleled in American history. Yet the vast majority of its perpetrators will never be prosecuted, and those who were have received minimal sentences. In the first in-depth scrutiny of the ways and means of this disaster, this groundbreaking book comes to disturbing conclusions about the deliberate nature of this financial fraud, the political collusion involved, and the leniency of the criminal justice system in dealing with these "Gucci-clad white-collar criminals." Using material from over one hundred interviews with government officials and industry leaders and recently declassified documents, the authors show how—contrary to previous government and "expert" explanations that chalked the disaster up to business risks gone awry or adverse economic conditions—S&L leaders engaged in deliberate fraud, stealing from their own corporations to speculate on high-risk ventures. Tempted by the insurance net, perpetrators looted their own institutions in a new kind of white-collar crime the authors dub "collective embezzlement." Big Money Crime also demonstrates how systematic political collusion—not just policy errors—was a critical ingredient in this unprecedented series of frauds. Bringing together statistics from a variety of government agencies, the authors provide a close reading of the track record of prosecutions and sentencing and find that "suite crime" receives much more lenient treatment than "street crime," despite its significantly higher price tag. The book concludes with a number of modest, but no less urgent, policy recommendations to counter the current deregulatory trend

and to avert a replay of the S&L debacle in other financial sectors. FROM THE BOOK: "We built thick walls; we have cameras; we have time clocks on the vaults . . . all these controls were to protect against somebody stealing the cash. Well, you can steal far more money, and take it out the back door. The best way to rob a bank is to own one."—House Committee on Government Operations, 1988

Religion, Welfare, and Social Service Provision: Common Ground delves deeply into the partnerships forged between religious communities, government agencies and nonprofits to deliver social services to the needy. These pages offer a considered examination of how local faith entities have served those in their midst, and how the provision of those services has been impacted by evolving social policies. This foundational volume brings together the work of more than two dozen leading researchers, each providing long overdue scholarly inquiry into religiously affiliated helping and the many possibilities that it holds for effective cooperation.

Assuming no prior knowledge, Educational Research by R. Burke Johnson and Larry Christensen offers a comprehensive, easily digestible introductory research methods text for undergraduate and graduate students. Readers will develop an understanding of the multiple research methods and strategies used in education and related fields; how to read and critically evaluate published research; and the ability to write a proposal, construct a questionnaire, and conduct an empirical research study on their own. Students rave about the clarity of this best seller and its usefulness for their studies, enabling them to become critical consumers and users of research.

The first-ever authorized biography of Jeff Gordon, the four-time champion racing legend. For over a year, Garner interviewed and observed Gordon at races, special events, and at home. The book is based on extensive interviews with Gordon as well as in-depth interviews with dozens of family members, friends, competitors, and

# Bookmark File PDF Rhetoric Inquiry Kirsten Benson Jeff Moody

colleagues, some of whom have never gone on the record before. Jeff speaks candidly, sometimes brutally so, about his childhood, his much publicized divorce, those he competed against, his family, and life after racing. This fully illustrated hardcover biography will allow privileged access to a wealth of exclusive unseen and rare material from Gordon's personal photo and memorabilia collection. Gordon's meteoric rise through racing's ranks is a classic American success story. Readers will find inspiration in Gordon's candid take on his pivotal life episodes."

This book is a printed edition of the Special Issue "Religion and Crime: Theory, Research, and Practice" that was published in Religions

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. *How People Learn II: Learners, Contexts, and Cultures* provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. *How People Learn II* will become an indispensable

resource to understand learning throughout the lifespan for educators of students and adults.

This book is the crown gem of the Society of Children's Book Writers and Illustrators publications. It contains virtually all the information you will need about writing and illustrating for the children's book market. It will help you chart your creative work from inception all the way through the process of publishing and marketing. THE BOOK includes the latest market reports, articles on social media, discussions of emerging publishing options, and up-to-the-minute directories of everything from agents to book reviewers to relevant blog sites. Time-sensitive material contained in THE BOOK is updated regularly on our website, scbwi.org. The SCBWI staff takes great pride in presenting you with this invaluable tool that will optimize your career, whether you are already well published or a newcomer to the field. Use it as your primary reference and workbook. THE BOOK is available to current SCBWI members only. Make sure when you order your copy that your name in the shipping address matches your member name so that we can confirm your membership. Members may only order one book at a time.
