medical students and physicians-in-training throughout the English-speaking world, as its many editions indicate. It is chock full of the pearls of clinical wisdom that students and practitioners treasure, and many of these lessons apply to medicine in general. The book was well characterized by a reviewer of an earlier edition for *The New England Journal of Medicine*: 'If only one book about surgery could be made available to physicians from all specialties, it should probably be Silen's recent revision of Cope's *Early Diagnosis of the Acute Abdomen*. Since the book first appeared, it has remained the classic treatise on the initial approach to abdominal pain.' Because acute, severe abdominal pain is still a common problem whose misdiagnosis can result in quick death, each generation of beginning physicians is faced with the urgency of learning to make a diagnosis in this high-

anxiety situation, and they appreciate the wise, humane, precisely detailed guidance offered by Cope and Silen. For the 22nd Edition, Dr. Silen has again updated the text in a respectful but significant way. He has added a chapter on the increasing disorder of diverticulitis, reexamines the use of analgesics, emphasizes the costs of over-testing, and updates all recommendations regarding trauma, radiologic studies, and therapeutic recommendations.

A study tool offering preparation for in-service and national qualifying exams. Comprising questions and answers which probe the reader's understanding of all aspects of surgery, this text is page-referenced to its parent work, Textbook of Surgery, 15th ed. The book emphasizes biologic principles underlying surgical practice.

As the field of general surgery continues to expand, the diagnostic and therapeutic pathways are becoming more complex. The diagnostic modalities available to the clinician can be both very helpful but also overwhelming considering the findings can often determine the scope of treatment for a patient. This text will take the major pathologies of the systems commonly studied in general surgery and present them in a unique format based upon algorithms. The algorithms will begin with the clinical presentation of the patient,
