Justen's Sanborn Magna Force 3hp air compressor. I can't recall what the object was and exactly where it touched. All I can recall is that something fell off the trash can touching something up and sending up sparks. Before this happened it was acting funny by tripping circuit breakers and cutting off before fully filling the tank with air.

~~Sanborn Magna Force 3hp air compressor that no longer runs.~~

Sanborn Air Compressors. Sanborn air compressors were manufactured originally by the Sanborn Manufacturing Company in Springfield, Minnesota. Their brand of compressor then was the Black Max air compressor. After some years Sanborn Manufacturing was acquired by Coleman Powermate, Inc. Subsequently, the Black Max air compressor line was discontinued as the original Sanborn brand.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Like most technical disciplines, environmental science and engineering is becoming increasingly specialized. As industry professionals focus on specific environmental subjects they become less familiar with environmental problems and solutions outside their area of expertise. This situation is compounded by the fact that many environmental science related

terms are confusing. Prefixes such as bio-, enviro-, hydra-, and hydro- are used so frequently that it is often hard to tell the words apart. The Environmental Engineering Dictionary and Directory gives you a complete list of brand terms, brand names, and trademarks - right at your fingertips.

Erhaps even more attractive is the idea to use the sun's heat for splitting water into hydrogen and oxygen and storing them in two separate vessels. The high temperature produced by recombining oxygen and hydrogen is known to be the most intense heat available to mankind. Moreover, one could use the hydrogen for lighting, and inexpensively produced oxygen would also close a longstanding gap. But how can one use the sun's energy to split water? In my opinion, thermopiles, which have already accomplished excellent performance, could solve this problem ..."--The Back Cover.
