The success of the entire food supply chain depends on the prosperity of farms and local communities. The direct climate change risks faced by the agricultural sector are therefore also risks to businesses and food supply chains. Hence the importance of resilience at farm level, community level and business level when looking at food supply chain policy and management. Climate Change Adaptation and Food Supply Chain Management highlights the issue of adaptation to climate change in food

supply chains, the management and policy implications and the importance of supply chain resilience. Attention is given to each phase of the supply chain: input production, agriculture, food processing, retailing, consumption and post-consumption. European case studies demonstrate the vulnerabilities of contemporary food supply chains, the opportunities and competitive advantages related to climate change, and the trans-disciplinary challenges related to successful climate adaptation. The authors argue for a redefinition of the way food supply chains are operated, located and coordinated and propose a novel approach enhancing climate-resilient food supply chain policy and management. This book will be of interest to students, researchers, practitioners and policymakers in the

facilitate access to scientific information, and encourage the diffusion of climate change technologies. For this reason, the 2030 Agenda for Sustainable Development highlights their centrality in the implementation of the Sustainable Development Goals (SDGs). At the same time, the intellectual property dimensions and implications of these efforts remain under-examined. Through selective case studies, this illuminating work contributes to a better understanding of the relationships between PPPs and intellectual property considered within a global knowledge governance framework, including innovation, capacity-building, technological learning, and diffusion. Linking the governance of intellectual property to the SDGs, this is the first book to chart

This Discussion Paper is another outcome of the “Liberation and Democracy in Southern Africa” project, which was coordinated at the Institute between 2001 and 2006. The papers are revised versions of presentations made at the “Comparative Sociology” Session of the Research Committee at the XVI World Congress of Sociology held at the end of July 2006 in Durban. They explore different aspects of the role of opposition parties in several East and Southern African countries, which differ according to the socio-political determinants.
