Design, Implement, and Audit the Most Energy-Efficient, Cost-Effective Solar Power Systems for Any Type of Building! Solar Power in Building Design is a complete guide to designing, implementing, and auditing energy-efficient, cost-effective solar power systems for residential, commercial, and industrial buildings. From basic theory through project planning, cost estimating, and manufacturing methods, this vital resource offers you everything needed for solar power design success. Filled with case studies and illustrations, this state-of-the-art design tool covers new solar technologies...design implementation techniques...energy conservation...the economics of solar power systems...passive solar heating power...and more. Solar Power in Building Design features: Step-by-step instructions for designing, implementing, and auditing solar power systems Expert guidance on using solar power in any type of building-from basic theory through project planning, cost estimating, and manufacturing Complete details on Leadership in Energy and Environmental Design (LEED), plus rebate procedures and forms Inside This Cutting-Edge Solar Power Toolkit • Solar power physics and technology • Practical guide to solar power design • Solar power design implementation • Energy conservation • Leadership in Energy and Environmental Design (LEED) • Sustainable energy rebate • Economics of solar power systems • Passive solar heating power

Written for leisure boat owners, the RYA Diesel Engine Handbook is essential reading for anyone doing the one-day RYA Diesel Engine Course. Easy to follow text and beautifully detailed colour illustrations enable the reader to develop the knowledge and confidence required by all diesel engine boat owners. Chapters include: How Diesel Engines Work Fuel The Air System Engine Cooling The Electrical System Diagnostics and Troubleshooting Maintenance Emergency Procedures Andrew Simpson is a marine journalist, yacht surveyor and designer based in Poole. He has written a number of other books on boating and is a regular contributor to yachting magazines both at home and abroad. When not in the UK he can usually be found sailing Mediterranean and Atlantic waters in Shindig, a 12m light displacement cutter he designed himself.

Diesel engines are installed in just about every yacht and in most large motorboats. This book explains how to prevent problems, troubleshoot and make repairs using safe techniques. It will help you save money on expensive

bills for yard work you could do yourself. Diesels Afloat covers everything from how the diesel engine works to engine electrics, from fault finding to out of season lay-up. With this guide and your engine's manual you can be confident in dealing with any problem, and get the best performance from your boat.

John C. Payne is a professional marine electrical engineer with 23 years merchant marine and off-shore oil experience.

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.

The coastal and archipelago areas in the Baltic Sea are popular destinations for a number of tourists. An important group of tourists is boaters, who visit the coastal areas during a short summer period. Boat owners are sometimes pictured as having a great interest for the nature and a willingness to do right. Pollution from pleasure boats such as discharges of oil and fuel, antifouling paints and cleaning agents have a negative impact on the coastal environment. Environmentally sound alternatives exist to some extent, but are not very common. Sustainable alternatives for boaters are lacking behind. One of the underlying purposes of this study was to understand how we can help boat owners change their behaviour and decrease the negative impact on the marine environment. The survey among boaters has been conducted in Finland, Sweden and Denmark with a web based survey ordered by the Keep Sweden Tidy Foundation together with Keep the Archipelago Tidy Association in Finland and the Danish Outdoor Council. The research was performed by SIFO Research International.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for Yachting Monthly and many other magazines worldwide, as well as the bestselling Boatowner's Practical and Technical Cruising Manual and Boatowner's Mechanical and Electrical Manual, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Pat Manley's bestselling book which tells you how to carry out the most common boat maintenance jobs.
