There are two ways for the beginner to shape blades—stock removal and forging. The forged blade is shaped by heating the steel to the plastic stage (1,800-2,100 degrees F) and then using a hammer to work it close to the final shape. There was a time when all blades were made by forging. Steel was expensive and even rare in those days.

Discovery Channel, shares her essential knifemaking tips and tricks, including step-by-step instructions for both forging and stock removal. We all use a knife pretty much every day, but for Zerra, her daily life often depends on the blade she takes with her into the wild. She's learned about what works and what doesn't, what steel will hold an edge, and what nuances in blade design will make or break a knife. From design to sharpening, A Modern Guide to Knifemaking covers every step in the knifemaking process. To begin, you will consider what you want your knife to accomplish, develop a design, and make a prototype. Zerra takes you through choosing and buying steel for your knife and then teaches you to build your own forge. You will learn forging basics and then move on to forge the shape of your knife and make the blade tip. From there, you will cut the blade profile, grind in bevels to make the edge of the knife, heat treat and temper your blade, grind and polish it, and make a handle and sheath for it. You will also learn sharpening techniques to maintain the edge of your new knife. Throughout, Zerra has included Pro-Tips from some of the leading knifemakers working today including Ken Onion, Kaila Cumings, and Mike Jones. A Modern Guide to Knifemaking covers every detail of knifemaking so you can make yourself the perfect knife.

It's a tool, a collectible, an aesthetic object, and even a piece of art. Knifemaking has experienced tremendous growth as a hobby, and now you can learn this craft. 205 color images and illustrated step-by-step instructions provide all stages of the knife's construction, from selection of the steel, to forging the blade, assembling the handle, and constructing a holder. Includes sections on safety, sources for materials, and 10 templates and designs to inspire your own ideas.

This book provides everything you need to know to get a head start on becoming a blade smith. This book is heavily illustrated with over 250 full-color photographs. The text details every aspect of the craft and provides step-by-step instructions as well as teaches tricks of the trade that will make each build a little easier. The book is designed to not only explain each step but also visually depict the process. The book is written for the layman and details making a full tang fixed blade knife by using the stock removal method, hand forging a hidden tang blade, and crafting a knife from a pre-cut commercially available knife blank. Learn what tools you will need, what steel is the best choice, how to profile the knives shape, how to grind flat bevels, hollow grinds and full flat bevels, how to harden the steel blade so it will be hard enough to hold an edge and strong enough not to break. The book also covers creative aspects of the craft like decorative blade etching and blade textures which allow the maker to transform a standard knife into a one of a kind piece of metal art. Whether it's for hunting or kitchen use, anyone interested in learning how to make a knife will surely find this book informative and indispensable.
