Endorsed by the Mulligan Concept Teachers Association (MCTA) The MCTA is the accredited body of Mulligan Concept teachers. A comprehensive and easy-to-follow resource for the manual therapist seeking to improve patients’ movement using pain-free hands-on techniques. The Mulligan Concept of manual therapy was developed by Brian Mulligan in 1983 and is now used by health practitioners globally to assist individuals in improving movement restrictions, pain with movement and functional restrictions. Designed as a companion to Mulligan Concept training courses, the text is divided by body regions, with techniques highlighting key information to assist with clinical reasoning and assessment, patient and practitioner positioning, guidelines for application and further adjustments. Covers 250 Mulligan techniques including 13 new techniques Addresses Mobilisation With Movement and pain release phenomenon Presents techniques in two formats: easy-to-follow bulleted list with annotated photographs and detailed step-by-step instructions New and improved photographs better illustrate technique execution Dictionary of annotations for techniques described Home exercises and taping techniques also included An eBook included in all print purchases All techniques comprehensively revised to align with current evidence-based practice 13 New Mulligan techniques An eBook included in all print purchases

Provides ideas for decorative stitching along with step-by-step instructions.

Content analysis is one of the most important but complex research methodologies in the social sciences. In this thoroughly updated Second Edition of The Content Analysis Guidebook, author Kimberly Neuendorf provides an accessible core text for upper-level undergraduates and graduate students across the social sciences. Comprising step-by-step instructions and practical advice, this text unravels the complicated aspects of content analysis.

Comprehensive. Detailed. Practical. Set Lighting Technician's Handbook, Fourth Edition, is a friendly, hands-on manual covering the day-to-day practices, equipment, and tricks of the trade essential to anyone doing motion picture lighting, including the lamp operator, rigging crew, gaffer, best boy, or director of photography. This handbook offers a wealth of practical technical information, useful techniques, as well as aesthetic discussions. The Set Lighting Technician's Handbook focuses on what is important when working on-set: trouble-shooting, teamwork, set protocol, and safety. It describes tricks and techniques for operating a vast array of lighting equipment including LEDs, xenons, camera synchronous strobes, black lights, underwater units, lighting effects units, and many others. Since its first edition, this handy on-set reference continues to be widely adopted as a training and reference manual by union training programs as well as top university film production programs. New to the fourth edition: * Detailed information on LED technology and gear * Harmonized with union safety and training procedures * All the latest and greatest DMX gadgets, including remote control systems * Many new and useful lights and how to use them and troubleshoot them. * New additions to the arsenal of electrical distribution equipment that make our sets safer and easier to power. * More rigging tricks and techniques. * the same friendly, easy to read style that has made this book so popular.

Travel to space and back with astronaut Chris Hadfield's "enthraling" bestseller as your eye-opening guide (Slate). Colonel Chris Hadfield has spent decades training as an astronaut and has logged nearly 4000 hours in space. During this time he has broken into a Space Station with a Swiss army knife, disposed of a live snake while piloting a plane, and been temporarily blinded while clinging to the exterior of an orbiting spacecraft. The secret to Col. Hadfield's success-and survival-is an unconventional philosophy he learned at NASA: prepare for the worst- and enjoy every moment of it. In An Astronaut's Guide to Life on Earth, Col. Hadfield takes readers deep into his years of training and space exploration to show how to make the impossible possible. Through eye-opening, entertaining stories filled with the adrenaline of launch, the mesmerizing wonder of spacewalks, and the measured, calm responses mandated by crises, he explains how conventional wisdom can get in the way of achievement – and happiness. His own extraordinary education in space has taught him some counterintuitive lessons: don't visualize success, do care what others think, and always sweat the small stuff. You might never be able to build a robot, pilot a spacecraft, make a music video or perform basic surgery in zero gravity like Col. Hadfield. But his vivid and refreshing insights will teach you how to think like an astronaut, and will change, completely, the way you view life on Earth – especially your own. "Hadfield proves himself to be not only a fierce explorer of the universe, but also a deeply thoughtful explorer of the human condition." –Maria Popova, Brain Pickings

A celebration of machine embroidery in all its forms, drawing on the significant archives of the Faculty of Art and Design at Manchester Metropolitan University.
