Health Sciences & Professions

hand. Indeed, we do not easily move out of one mind-set into another. What we believe to be true given our particular experience often seems to be the only truth. Often we need some outside force to trigger reevaluation and rethinking. That triggering force to intellectual growth may be a new idea, a new situation, a new value, a new boss, or some other significant emotional event – maybe, even, a new book. The Resear ch Foundation This book is founded on two pillars: one, a model of five leadership mind-sets c- mon in the last 100 years first presented in Gilbert W. Fairholm ' s (1998a, 1998b) book, Perspectives on Leadership: From the Science of Management to its Spiritual Heart ; and two, Matthew R. Fairholm ' s (2002) dissertation, Conceiving Leadership: Exploring Five Perspectives of Leadership by Investigating the Conceptions and Experiences of Selected Metropolitan Washington Area Municipal Managers , which analyzed and validated the perspectives model (see the Appendix for more details). The data collected confirm there are five distinct perspectives of leadership evident in the 100-year history of leadership study and practice. The resulting model defines the five perspectives in terms of descriptions of leadership in action, leadership tools and behaviors, and the way leaders approach their relationship to followers. The five perspectives are related hierarchically so that they progressively encompass a unique perspective of the leadership phenomenon.

"Examining some of the new and emerging issues in strategic management, Loizos Heracleous offers a fresh approach to the established ideas of strategy. Beginning with the historical development of the strategy field, including the influence of industrial organization and the resource-based view, he develops a new perspective labeled an "organizational action" view of strategy. This approach is theoretically underlain by organization theory and takes seriously such issues as the role of agency, the need for a longitudinal focus on process, the complexities of strategy implementation, and organizational facets such as strategic choice, organizational culture, organizational discourses and learning. Combining theoretical subtlety with an applied orientation, Heracleous examines topical areas such as corporate governance, inter-organization networks, and organizing for the future. With original research and extensive surveys of the strategy literature, combined with a strong practical orientation, this book is ideal for MBA students, strategy researchers, and the more thoughtful practitioner."--BOOK JACKET.

This new edition builds on the strengths and successes of the first edition and has been fully updated to reflect changes in the world of work, following the global financial crisis. The authors combine a managerial approach, focusing on practical, real – world applications, with a rigorous critical perspective that analyses the research behind the theories. The text addresses alternative theoretical perspectives, in parallel to the introduction of new worldwide cases and examples. New pedagogical features, such as the Ethical Dilemma and Critical Thinking boxes, reinforce the critical approach. The concise coverage of the core topics can be applied to both one – semester and year – long teaching and learning patterns.

This book discusses the essential elements of management with a sound balance of theory and practice. It encapsulates a comprehensive approach to managing situations with an aim to achieve goals on time, within budget and as per specified standards. It presents a comprehensive body of knowledge on this subject having theoretical, research based as well as application oriented elements.

Leadership in Organizations is the first in a series of three books written primarily for distance-learning students in online undergraduate and graduate programs with a focus on management, leadership, and organizational development. This first book introduces concepts, theories, and principles of leadership across a broad spectrum and is intended for students in online courses on leadership, management, and business. A signature theme of the book is the distinction between leadership and management. This book presents a real-world view to help students learn to recognize the dynamics of leadership theory in operation so that they can begin to apply these principles to situations in their work environments.

Seminar paper from the year 2016 in the subject Business economics - Business Management, Corporate Governance, grade: 2.1 (A), University of West Scotland (Business School), course: Doctorate of Business Administration, language: English, abstract: There is no doubt of leaders ' existence and profound contribution in developing human civilization. History is littered with stories of many great leaders. Some are recognized for their dexterity in the battlefields, some perhaps for their business acumen or for inspiration for their employees. Whatever the reasons for fame, humans have recognized that the capability of an individual to make others take action and achieve goals makes them stand out in society. However, the question still remains - what is it that makes them different? Hence the purpose of this theoretical paper is to provide a review of the definition of leadership and of the three main theories of leadership, namely T trait, Behaviour, and Contingency Theory. The author then chooses a particular focus on Contingency Theory, which is analysed further.

Leadership for Health Professionals, Third Edition is the first textbook of its kind to apply classical knowledge of leadership theory and time-honored best practices of industry leaders to a health organization context. This comprehensive and well-organized text is grounded in real-world applications of theoretical concepts, and focuses on practical examples of leadership in actual healthcare scenarios.

This book is not available as a print inspection copy. To download an e-version click here or for more information contact your local sales representative. Now in its Second Edition, Studying Leadership continues to provide a comprehensive overview of the key theories, topics, research debates and major developments in the field of leadership studies. Split into three parts, the book covers the traditional and mainstream theories on leadership; the main topics and perspectives explored in leadership research, and the recent trends in leadership studies such as gender and diversity, ethics, sustainability, language and identity. The new edition features a chapter on “ Researching Leadership ” and includes extended case studies to enhance learning and support students with their dissertations and research projects. The book is complemented by a companion website featuring a range of tools and resources for lecturers and students, including chapter specific multiple-choice questions, case studies, videos with critical thinking questions and discussion questions, free SAGE journal articles, PowerPoint slides and an instructor ' s manual. Suitable reading for students on leadership courses across a range of subjects including Business & Management, Health and Education.
