Award-winning entrepreneur and journalist Shane Snow reveals the counterintuitive reasons why so many partnerships and groups break down--and why some break through. The best teams are more than the sum of their parts, but why does collaboration so often fail to fulfill this promise? In Dream Teams, Snow takes us on an adventure through history, neuroscience, psychology, and business, exploring what separates groups that simply get by together from those that get better together. You'll learn: * How ragtag teams--from soccer clubs to startups to gangs of pirates--beat the odds throughout history. * Why DaimlerChrysler flopped while the Wu-Tang Clan succeeded, and the surprising factor behind most failed mergers, marriages, and partnerships. * What the Wright Brothers' daily arguments can teach us about group problem solving. * Pioneering women in law enforcement, unlikely civil rights collaborators, and underdog armies that did the incredible together. * The team players behind great social movements in history, and the science of becoming open-minded. Provocative and entertaining, Dream Teams is a landmark work that will change the way we think about people, progress, and collaboration.

You may be a hacker and not even know it. Being a hacker has nothing to do with cyberterrorism, and it doesn't even necessarily relate to the open-source movement. Being a hacker has more to do with your underlying assumptions about stress, time management, work, and play. It's about harmonizing the rhythms of your creative work with the rhythms of the rest of your life so that they amplify each other. It is a fundamentally new work ethic that is revolutionizing the way business is being done around the world. Without hackers there would be no universal access to e-mail, no Internet, no World Wide Web, but the hacker ethic has spread far beyond the world of computers. It is a mind-set, a philosophy, based on the values of play, passion, sharing, and creativity, that has the potential to enhance every individual's and company's productivity and competitiveness. Now there is a greater need than ever for entrepreneurial versatility of the sort that has made hackers the most important innovators of our day. Pekka Himanen shows how we all can make use of this ongoing transformation in the way we approach our working lives.

The metaphors have always been there: Ebbs and flows. Riding high. The reward of the ocean crest. The risk of the eventual crash. Like the ocean, the marketplace is constantly changing, causing the buttoned-up businessperson to oftentimes feel like a sun-burned, sand-encrusted surfer trying desperately to ride his next barrel. So maybe before taking your next venture out into the cresting and crashing marketplace ocean, there are some lessons to learn from the experts: surfers! Like successful entrepreneurs, big-wave surfers rely on preparation, passion, and persistence--and they relish a challenge. So it's no surprise that countless surfers have pioneered products and launched thriving businesses, including GoPro Cameras, O'Neill, Reef, and Quiksilver. Packed with stories of surf innovators, entrepreneurs, and legends, Make Your Own Waves reveals 10 rules of the water that the successful entrepreneur must adhere to as well, including:• Learn to swim--the basics set the stage for everything• Get wet--you can't succeed if you stay on the beach• Always look "outside"--watch for what's coming or you may miss a better opportunity• Commit, charge, shred--you have to go all out to be all in• Never turn your back on the ocean--always stay in touch with the marketplace and the customer• Stay stoked--desire drives success• And more! Even the best surfers fall, but they learn from their wipeouts and paddle back out to once again push the edge, knowing that with big waves come big opportunities. Don't just sit on the beach. Grab your board and get in!
